Winning Space Brandon J. Weichert, 2020-09-15 When President Donald J Trump announced the creation of America's sixth branch of the military the United States Space Force many in Washington scoffed But U S rivals in China Russia Iran and North Korea took notice Since the end of the Cold War these American foes have chafed under the full spectrum dominance that the American superpower has enjoyed globally They have identified space as a key strategic domain where they can challenge and possibly defeat the United States military And depriving the U S military and or its economy of access to space during an international crisis could spell doom for the United States in other strategic domains land sea air and cyberspace After all space is critical for America's vaunted information dominance Satellites overhead are the backbone of America's global military Remove them from orbit and U S forces worldwide are rendered deaf dumb and blind What's more space is a more than 1 trillion economy just waiting to be developed Whichever country gets there first will have considerable economic and geopolitical power on Earth Despite President Trump's creation of the Space Force Swamp Dwellers in Washington continue resisting his reforms to U S space and technology policy

Winning Space tracks the increasing competition the United States is facing in the technology sector and depicts how the United States has been engaged in a Second Space Race and how it has been losing Author Brandon Weichert warns how the United States is at risk for a Pearl Harbor type event in space Weichert advocates for the full embrace of Trump's reforms for America's flailing space policy while also calling for a minimum 1 trillion investment in advanced research and development here in the United States to stay ahead of America's advancing foes Contrary to what many Americans may think the United States has been declining in space and the high technology development sector Should it lose its dominance in these areas it will surely lose its superpower status The next decade presents U S policymakers one last chance to preserve the superpower status that America fought two world wars and the Cold War to build Time is not on our side We are on notice but we have not noticed

Historical Dictionary of Russian and Soviet Foreign Policy Norman E. Saul, 2014-12-16 The conduct of the foreign relations of the Russian state in its several contexts Kiev Rus Muscovy Russian Empire Provisional Government Union of Soviet Socialist Republics and Russian Federation were unique in its common currents from the beginning to the present Geography was certainly a key factor located in the center of the world's largest land mass and surrounded by often hostile forces All of the Russias had to confront the problems of open frontiers and the conduct of relations with a number of

adjacent states of different ethnicity and with many that were more distant No other nation states had to face such complex and divergent circumstances over their histories Most other Great Powers were neighbors of similar states in culture and historical background whereas Russia had to deal with Asian as well as European countries The Historical Dictionary of Russian and Soviet Foreign Policy covers the history through a chronology an introductory essay appendixes and an extensive bibliography The dictionary section has over 700 cross referenced entries on important individuals events and other aspects of the foreign policy of this important country This book is an excellent access point for students researchers and anyone wanting to know more about Russian foreign policy

Critical Approaches to Security in Central Asia

Edward Lemon, 2020-05-21 Central Asia remains on the periphery both spatially and in people's imaginations When the region does attract international attention it is often related to security issues including terrorism ethnic conflict and drug trafficking This book brings together leading specialists from a range of disciplines including geography anthropology sociology and political science to discuss how citizens and governments within Central Asia think about and practise security The authors explore how governments use fears of instability to bolster their rule and how securitized populations cope with and resist being labelled threats through strategies that are rarely associated with security including marriage and changing their appearance This collection examines a wide range of security issues including Islamic extremism small arms interethnic relations and border regions While coverage of the region often departs from preconceived notions of the region as dangerous obscure and volatile the chapters in this book all place emphasis on the way local people understand security and harmony in their daily lives This book will be of interest to students and researchers of Central Asian Studies as well as Security Studies and Political Science The chapters were originally published in the journal Central Asian Survey

Understanding Media Propaganda in the 21st Century Simon Foley, 2021-09-02 First published in 1988 Herman and Chomsky's Manufacturing Consent remains the go to book for those interested in understanding why the mainstream media act as vehicles for power elite propaganda The analytical heart of Manufacturing Consent lies in what it calls The Propaganda Model According to this model there are five filters which all newsworthy stories have to pass through before reaching the public sphere However a lot has changed in the subsequent thirty something years Consequently a key question that needs to be addressed is whether Manufacturing Consent is still fit for purpose The conceit underpinning Understanding Media Propaganda in the 21st Century Manufacturing Consent Revisited and Revised is that the election of Trump in 2016 constitutes the proverbial year zero for fourth estate journalism As a result of the journalistic cultural revolution that ensued it argues that the Propaganda Model needs to be overhauled if it is to retain its epistemological bona fides To this end this book is a radical in the true critical sense of the word intervention into the propaganda fake news debate For students in the broadest sense of the term of media studies journalism communication studies and sociology it provides both a compelling critique of Herman and Chomsky's Propaganda Model while at the same time proffering a new explanatory model to understand why MSM output typically replicates the stenographer for power playbook

The New Era in U.S. National Security Jack A. Jarmon, 2019-10-24 The purpose of The New Era in U S National Security Challenges of the Information Age is to make its readers aware of how the tensions between opposing forces from above and below influence world events and shape U S national security institutions The debt trap now being experienced by the developing world has unleashed global migration on a mass scale In a world where market forces are politically unaccountable crime will prosper and its linkage to organizing social structures is organic The nexus between corrupt politicians transnational business and cross border crime pulls tighter Meanwhile the structures of global governance are immature Differences of

agreement over international norms and controls regarding the use of the Internet and the laws pertaining to the deployment of cyber weapons are illusive if not insurmountable The chasm between the rich and poor is widening and deepening Hostilities continue mount In this book Jack A Jarmon offers a survey of the altering landscape of warfare and competition Using recent events and documented experiences as examples it reveals truths about the threat from criminals terrorists hostile governments and internal vulnerabilities The nation s exposure invites attack with every hour Rather than an abstract threat these unseen and unreported assaults land blows to our information networks infrastructure quality of life and democratic system
