Impure Science Steven Epstein,1996 Epstein shows the extent to which AIDS research has been a social and political phenomenon and how the AIDS movement has transformed biomedical research practices through its capacity to garner credibility by novel strategies

Impure Science Steven Gary Epstein,1993 Chemistry: The Impure Science Bernadette Bensaude-vincent,Jonathan Simon,2008-10-16 This book uses history to introduce central issues in the philosophy of chemistry Mobilizing the theme of impurity it explores the tradition of chemistry s negative image It then argues for the positive philosophical value of chemistry reflecting its characteristic practical engagement with the material world The book concludes with some ethical reflections concerning chemistry s orientations in the twenty first century The authors have previously both offered significant contributions to the history and philosophy of chemistry a

Impure Science Steven G. Epstein,1995 *Invisible Illness* Emily Mendenhall,2026-01-06 A moving cultural history of disability and a powerful call to action to change how our medical system and society supports those with complex chronic conditions From lupus to Lyme invisible illness is often dismissed by everyone but the sufferers Why does the medical establishment continually insist that when symptoms are hard to explain they are probably just in your head Inspired by her work with long COVID patients medical anthropologist Emily Mendenhall traces the story of complex chronic conditions to show why both research and practice fail so many Mendenhall points out disconnects between the reality of chronic disease which typically involves multiple intersecting problems resulting in unique individualized illness and the assumptions of medical providers who behave as though chronic diseases have uniform effects for everyone And while invisible illnesses have historically been associated with white middle class women being believed that you are sick is even more difficult for patients whose social identities and lived experiences may not align with dominant medical thought Weaving together cultural history with intimate interviews *Invisible Illness* upholds the experiences of those living with complex illness to expose the failures of the American healthcare system and how we can do better

Bulletin of the Atomic Scientists ,1951-07-31 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world

Impure Science Robert Bell,1992-04-29 The author lifts the veil of secrecy from scientific research conducted in this country He presents a shattering indictment of the scientific community from the halls of government to the research centers at major universities and corporations Documents case after case of influence peddling doctored research and outright fraud and reveals how the twin forces of money and status compromise and corrupt the pursuit of scientific truth

Acting in an Uncertain World Michel Callon,Pierre Lascoumes,Yannick Barthe,2011-01-21 A call for a new form of democracy in which hybrid forums composed of experts and laypeople address such sociotechnical controversies as hazardous waste genetically modified organisms and nanotechnology Controversies over such issues as nuclear waste genetically modified organisms

asbestos tobacco gene therapy avian flu and cell phone towers arise almost daily as rapid scientific and technological advances create uncertainty and bring about unforeseen concerns The authors of *Acting in an Uncertain World* argue that political institutions must be expanded and improved to manage these controversies to transform them into productive conversations and to bring about technical democracy They show how hybrid forums in which experts non experts ordinary citizens and politicians come together reveal the limits of traditional delegative democracies in which decisions are made by quasi professional politicians and techno scientific information is the domain of specialists in laboratories The division between professionals and laypeople the authors claim is simply outmoded The authors argue that laboratory research should be complemented by everyday experimentation pursued in the real world and they describe various modes of cooperation between the two They explore a range of concrete examples of hybrid forums that have dealt with sociotechnical controversies including nuclear waste disposal in France industrial waste and birth defects in Japan a childhood leukemia cluster in Woburn Massachusetts and mad cow disease in the United Kingdom The authors discuss the implications for political decision making in general and describe a dialogic democracy that enriches traditional representative democracy To invent new procedures for consultation and representation they suggest is to contribute to an endless process that is necessary for the ongoing democratization of democracy

The Roving Mind Isaac Asimov, 2010-10-28 Isaac Asimov's death on April 6 1992 was a great loss to literature science and freethought The vision of one of America's most prolific authors is unmatched today and his pointed honesty shines through in this fascinating collection of essays now reissued in this special tribute edition Asimov demonstrates his extraordinary skill at disseminating knowledge from across the spectrum of scientific disciplines as his roving mind ranges from the polemical to the persuasive from the speculative to the realistic The sixty two essays in this volume include such subjects as creationism the distinction between real science and pseudoscience censorship the population explosion technophobia the social consequences of technological progress cloning the possibility of contacting extraterrestrial life and the wonders of the cosmos There are also thoughts on his style of writing stories about his personal life and recollections of family history all written in the clear and elegant prose for which Asimov was noted **Pure Gold from the Words of Sayyidi 'Abd al-'Aziz al-Dabbāgh** John O'Kane, Bernd Radtke, 2007-11-30 Around 1720 in Fez A mad b al Mub rak al Lama a religious scholar wrote down the words and teachings of the Sufi master Abd al Az z al Dabb gh Al Dabb gh shunned religious studies but having reached illumination and met with the Prophet Mu ammad he was able to explain any obscurities in the Qur n ad ths and sayings of earlier Sufis The resulting book known as the Ibr z describes how al Dabb gh attained illumination and access to the Prophet as well as his teachings about the Council of the godly that regulates the world relations between master and disciple the darkness in men's bodies Adam's creation Barzakh Paradise and Hell and much more besides This encyclopaedia of Sufism with its many teaching stories and illustrations provides a window onto social life and religious ideas in Fez a generation or so before powerful outside forces began to play a role in the radical

Besley, Anthony Dudo, 2022-09-27 What tactics can effective science communicators use to reach a wide audience and achieve their goals Effective science communication the type that can drive behavior change while boosting the likelihood that people will turn to science when faced with challenges is not simply a matter of utilizing social media or employing innovative tactics like nudges Even more important for success is building long term strategic paths to achieve well articulated goals Smart science communicators also want to create communication opportunities to improve their own thinking and behavior In this guidebook John C Besley and Anthony Dudo encapsulate their practical expertise in 11 evidence based principles of strategic science communication Among other things science communicators they argue should strive to seem competent warm honest and willing to listen Their work should also convey a desire to make the world a better place Highlighting time tested methods for building rapport with an audience through several modes of communication Besley and Dudo explain how to achieve each strategic objective All scientific communication is goal oriented and Besley and Dudo discuss the importance of recognizing the right goals then employing strategic and tactical communication in order to achieve them Finally they offer specific suggestions for how practitioners can evaluate the effectiveness of their communications and in fact build evaluation into their plans from the beginning Strategic Science Communication is the first book to use social science to help scientists and professional science communicators become more evidence based Besley and Dudo draw on insightful research into the science of science communication to provide readers with an opportunity to think more deeply about how to make communication choices This guidebook is essential reading for all professionals in the field Science and Democracy Stephen Hilgartner, Clark Miller, Rob Hagendijk, 2015-03-05 In the life sciences and beyond new developments in science and technology and the creation of new social orders go hand in hand In short science and society are simultaneously and reciprocally coproduced and changed Scientific research not only produces new knowledge and technological systems but also constitutes new forms of expertise and contributes to the emergence of new modes of living and new forms of exchange These dynamic processes are tightly connected to significant redistributions of wealth and power and they sometimes threaten and sometimes enhance democracy Understanding these phenomena poses important intellectual and normative challenges neither traditional social sciences nor prevailing modes of democratic governance have fully grappled with the deep and growing significance of knowledge making in twenty first century politics and markets Building on new work in science and technology studies STS this book advances the systematic analysis of the coproduction of knowledge and power in contemporary societies Using case studies in the new life sciences supplemented with cases on informatics and other topics such as climate science this book presents a theoretical framing of coproduction processes while also providing detailed empirical analyses and nuanced comparative work Science and Democracy Knowledge as Wealth and Power in the Biosciences and Beyond will be interesting for students of sociology science technology studies history of science genetics political science and public administration

A Guided Science Jaan Valsiner, 2017-07-05 That sciences are guided by explicit and implicit ties to their surrounding social world is not new Jaan Valsiner fills in the wide background of scholarship on the history of science the recent focus on social studies of sciences and the cultural and cognitive analyses of knowledge making The theoretical scheme that he uses to explain the phenomena of social guidance of science comes from his thinking about processes of development in general his theory of bounded indeterminacy and on the relations of human beings with their culturally organized environments Valsiner examines reasons for the slow and nonlinear progress of ideas in psychology as a science at the border of natural and social sciences Why is that intellectual progress occurs in different countries at different times Most responses are self serving blinders for presenting science as a given rather than understanding it as a deeply human experience For Valsiner scientific knowledge is cultural at its core Major changes have occurred in contemporary sciences collective authorship fragmentation of knowledge into small quickly published and equally quickly retractable journal articles and the counting of numbers of such articles by institutions as if that is a measure of scientific productivity Scientists are inherently ambivalent about the benefit of these changes for the actual development of knowledge There is a gradual takeover of the domain of scientific knowledge creation by other social institutions with vested interests in defending and promoting knowledge that serves their social interests Sciences are entering into a new form of social servitude **Learning Through Citizen**

Science National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Science Education, Committee on Designing Citizen Science to Support Science Learning, 2019-01-28 In the last twenty years citizen science has blossomed as a way to engage a broad range of individuals in doing science Citizen science projects focus on but are not limited to nonscientists participating in the processes of scientific research with the intended goal of advancing and using scientific knowledge A rich range of projects extend this focus in myriad directions and the boundaries of citizen science as a field are not clearly delineated Citizen science involves a growing community of professional practitioners participants and stakeholders and a thriving collection of projects While citizen science is often recognized for its potential to engage the public in science it is also uniquely positioned to support and extend participants learning in science Contemporary understandings of science learning continue to advance Indeed modern theories of learning recognize that science learning is complex and multifaceted Learning is affected by factors that are individual social cultural and institutional and learning occurs in virtually any context and at every age Current understandings of science learning also suggest that science learning extends well beyond content knowledge in a domain to include understanding of the nature and methods of science Learning Through Citizen Science Enhancing Opportunities by Design discusses the potential of citizen science to support science learning and identifies promising practices and programs that exemplify the promising practices This report also lays out a research agenda that can fill gaps in the current understanding of how citizen science can support science learning and enhance science education **A Dictionary of Pharmaceutical Science** Hiram

V. Sweringen,1882 *Science in the Context of Application* Martin Carrier,Alfred Nordmann,2010-11-12 We increasingly view the world around us as a product of science and technology Accordingly we have begun to appreciate that science does not take its problems only from nature and then produces technological applications but that the very problems of scientific research themselves are generated by science and technology Simultaneously problems like global warming the toxicology of nanoparticles or the use of renewable energies are constituted by many factors that interact with great complexity Science in the context of application is challenged to gain new understanding and control of such complexity it cannot seek shelter in the ivory tower or simply pursue its internal quest for understanding and gradual improvement of grand theories Science in the Context of Application will identify explore and assess these changes Part I considers the Changing Conditions of Scientific Research and part II Science Values and Society Examples are drawn from pharmaceutical research the information sciences simulation modelling nanotechnology cancer research the effects of commercialization and many other fields The book assembles papers from well known European and American Science Studies scholars like Bernadette Bensaude Vincent Janet Kourany Michael Mahoney Margaret Morrison Hans J rg Rheinberger Arie Rip Dan Sarewitz Peter Weingart and others The individual chapters are written to address anyone who is concerned about the role of contemporary science in society including scientists philosophers and policy makers **Science & Civic Life** Kris Morrissey,Robert Garfinkle,2017-09-29 This book promotes the idea and the practice of a scientific culture in science museums art museums gardens libraries coffee houses school meetings and social gatherings It encourages common man to think about use and sometimes contribute to science **Elgar Encyclopedia of Science and Technology Studies** Ulrike Felt,Alan Irwin,2024-10-03 This Encyclopedia provides a comprehensive overview of the expanding field of science and technology studies STS Covering key frameworks themes and topics Ulrike Felt and Alan Irwin bring together expert contributors to map the development of STS within its historical and intellectual context **Science and the Media** Massimiano Bucchi,2012-10-12 In the days of global warming and BSE science is increasingly a public issue This book provides a theoretical framework which allows us to understand why and how scientists address the general public The author develops the argument that turning to the public is not simply a response to inaccurate reporting by journalists or to public curiosity nor a wish to gain recognition and additional funding Rather it is a tactic to which the scientific community are pushed by certain internal crisis situations Bucchi examines three cases of scientists turning to the public the cold fusion case the COBE Big Bang issue and Louis Pasteur s public demonstration of the anthrax vaccine a historical case of public science Finally Bucchi presents his unique model of communications between science and the public carried out through the media This is a thoughtful and wide ranging treatment of complex contemporary issues touching upon the history and sociology of science communication and media studies Bucchi s theories on scientific communication in the media are a valuable contribution to the current debate on this subject **Science in the Archives** Lorraine Daston,2022-12-22 Archives bring to mind rooms

filled with old papers and dusty artifacts But for scientists the detritus of the past can be a treasure trove of material vital to present and future research fossils collected by geologists data banks assembled by geneticists weather diaries trawled by climate scientists libraries visited by historians These are the vital collections assembled and maintained over decades centuries and even millennia which define the sciences of the archives With *Science in the Archives* Lorraine Daston and her co authors offer the first study of the important role that these archives play in the natural and human sciences Reaching across disciplines and centuries contributors cover episodes in the history of astronomy geology genetics philology climatology medicine and more as well as fundamental practices such as collecting retrieval and data mining Chapters cover topics ranging from doxology in Greco Roman Antiquity to NSA surveillance techniques of the twenty first century Thoroughly exploring the practices politics economics and potential of the sciences of the archives this volume reveals the essential historical dimension of the sciences while also adding a much needed long term perspective to contemporary debates over the uses of Big Data in science
