inhabitants and social scientists he shows how postwar dwelling was caught between the purview of the welfare state and the rise of mass consumerism The Social Project unearths three decades of architectural and social experiments centered on the dwelling environment as it became an object of modernization an everyday site of citizen participation and a domain of social scientific expertise Beyond state intervention it was this new regime of knowledge production that made postwar modernism mainstream The first comprehensive history of these wide ranging urban projects this book reveals how housing in postwar France shaped both contemporary urbanity and modern architecture
