Liquidation Guide 2014:

Rescue of Business in Europe Bob Wessels, Stephan Madaus, European Law Institute, 2020-01-30 This edited volume is based on the European Law Institute's project The Rescue of Business in Insolvency Law which ran from 2013 to 2016. The project sought to investigate and articulate the essential features of well-functioning procedures for the rescue of distressed but viable businesses. Although the focus was primarily on the design and implementation of formal procedures that is those provided by law, the project also required consideration of the interaction between such procedures and informal solutions to distress given the obvious cost advantages of the latter. The ELI project was not confined exclusively to restructurings since these are only one possible route to maximising the value of a distressed but viable business: an auction procedure in which the business is sold on a going concern basis to a new owner is one obvious alternative. The ELI project encompasses various aspects of both public constitutional law and insolvency law that may have a bearing on the functionality of formal

restructuring procedures. **Routledge Handbook on Transnational Commercial Law** Bruno Zeller, Camilla Baasch Andersen, 2025-02-21 This handbook edited by Zeller and Andersen is an indispensable contribution to the field of transnational commercial law. With an introduction by Sir Roy Goode, this book presents perspectives on legal issues of international sales transactions as perceived by world-leading experts, exposing pragmatic and modern aspects of everything from drafting to uniform laws to dispute resolution. The book divides itself between fundamental knowledge of transnational commercial law (e.g. chapters on forum shopping, CISG, Cape Town Convention etc.) and current and topical developments (e.g. chapters on blockchain, smart contracts, metaverse, digital assets etc.). International or transnational trade during the past twenty years has become more and more important, outstripping domestic trade as a hallmark of economic success. Model laws developed by the United Nations and other international bodies are now being transplanted or ratified by countries so a translational element must always be considered as part of any choice of law. Addressing a global audience as the instruments dealt with herein apply to many states in different regions, this handbook aims not only at an undergraduate and graduate student audience but also will interest professional lawyers. *International Trade with the Middle East and North Africa*
