tensions disavows its capture within the building industry or affirms commercial practice over disciplinary knowledge

Recoding Architecture Pedagogy Insurgency and Invention cracks open horizons of possibility by showing how intensifying agonistic relationships between the myriad binaries that characterize architecture and its teaching is generative in ways conciliatory synthesis cathartic resolution and uncritical affirmation are not [Utopias and Architecture](#) Nathaniel Coleman,2007-05-07 Utopian thought though commonly characterized as projecting a future without a past depends on golden models for re invention of what is Through a detailed and innovative re assessment of the work of three architects who sought to represent a utopian content in their work and a consideration of the thoughts of a range of leading writers Coleman offers the reader a unique perspective of idealism in architectural design With unparalleled depth and focus of vision on the work of Le Corbusier Louis I Kahn and Aldo van Eyck this book persuasively challenges predominant assumptions in current architectural discourse forging a new approach to the invention of welcoming built environments and transcending the limitations of both the postmodern and hyper modern stance and orthodox modernist architecture

Roth,2018-03-13 This widely acclaimed beautifully illustrated survey of Western architecture is now fully revised throughout including essays on non Western traditions The expanded book vividly examines the structure function history and meaning of architecture in ways that are both accessible and engaging [Kahn at Penn](#) James Williamson,2015-03-24 Louis I Kahn is widely known as an architect of powerful buildings But although much has been said about his buildings almost nothing has been written about Kahn as an unconventional teacher and philosopher whose influence on his students was far reaching Teaching was vitally important for Kahn and through his Master s Class at the University of Pennsylvania he exerted a significant effect on the future course of architectural practice and education This book is a critical in depth study of Kahn s philosophy of education and his unique pedagogy It is the first extensive and comprehensive investigation of the Kahn Master s Class as seen through the eyes of his graduate students at Penn **John Ruskin and the Fabric of Architecture** Anuradha Chatterjee,2017-10-02 Through the theoretical lenses of dress studies gender science and visual studies this volume analyses the impact John Ruskin has had on architecture throughout the nineteenth and twentieth centuries It explores Ruskin s different ideologies such as the adorned wall veil which were instrumental in bringing focus to structures that were previously unconsidered John Ruskin and the Fabric of Architecture examines the ways in which Ruskin perceives the evolution of architecture through the idea that architecture is surface The creative act in architecture analogous to the divine act of creation was viewed as a form of dressing By adding highly aesthetic features to designs taking inspiration from the veil of women s clothing Ruskin believed that buildings could be transformed into meaningful architecture This volume discusses the importance of Ruskin s surface theory and the myth of feminine architecture and additionally presents a competing theory of textile analogy in architecture based on morality and gender to counter Gottfried Semper s historicist perspective This book would be beneficial to students and academics of

architectural history and theory gender studies and visual studies who wish to delve into Ruskin's theories and to further understand his capacity for thinking beyond the historical methods The book will also be of interest to architectural practitioners particularly Ruskin's theory of surface architecture Tradition as Mediation: Louis I. Architecture From the Outside In Robert Gutman, 2012-04-17 Architecture and sociology have been fickle friends over the past half century in the 1960s architects relied on sociological data for design solutions and sociologists were courted by the most prestigious design schools to lecture and teach Twenty years later at the height of postmodernism it was passe to be concerned with the sociological aspects of architecture Currently the rising importance of sustainability in building not to mention an economical crisis brought on in part by a real estate bubble have forced architects to consider themselves in a less autonomous way perhaps bringing the profession full circle back to a close relationship with sociology Through all these rises and dips Robert Gutman was a strong and steady voice for both architecture and sociology Gutman a sociologist by training infiltrated architecture's ranks in the mid 1960s and never looked back A teacher for over four decades at Princeton's School of Architecture Gutman wrote about architecture and taught generations of future architects all while maintaining an outsider status that allowed him to see the architectural profession in an insightful unique way

Spirituality in Architectural Education Julio Bermudez, 2021-10-15 How does spirituality enter the education of an architect Should it What do we mean by spirituality in the first place Isn't architectural education a training ground for professional practice and therefore technically and secularly oriented Is there even room to add something as esoteric if not controversial as spirituality to an already packed university curriculum The humanistic and artistic roots of architecture certainly invite us to consider dimensions well beyond the instrumental including spirituality But how would we teach such a thing And why if spirituality is indeed relevant to learning architecture have we heard so little about it Spirituality in Architectural Education addresses

these and many other important philosophical disciplinary pedagogic and practical questions Grounded on the twelve year old Walton Critic Program at the Catholic University of America School of Architecture and Planning this book offers solid arguments and insightful reflections on the role that big questions and spiritual sensibility ought to play in the architectural academy today Using 11 design studios as stopping grounds the volume takes the reader into a journey full of meaningful interrogations pedagogic techniques challenging realizations and beautiful designs Essays from renowned architects Craig W Hartman Juhani Pallasmaa Alberto Campo Baeza Claudio Silvestrin Eliana B rmida Michael J Crosbie Prem Chandavarkar Rick Joy Susan Jones and Daniel Libeskind open new vistas on the impact of spirituality in architectural education and practice All this work is contextualized within the ongoing discussion of the role of spirituality and religion in higher education at large The result is an unprecedented volume that starts a long awaited conversation that will advance architectural schooling ACSA Distinguished Professor Julio Bermudez with recognized expertise on spirituality in architecture will be the guide in this fascinating and contemplative journey **Precedented Environmental Futures** Colin Porteous, 2019-04-17 This book addresses the built environment through the lens of environmental architecture and in a holistic manner It moves gradually from psychophysiology and thinking doing feeling modalities through environmental criteria to environmental modulation concluding with a debate around mitigation and adaptation Much use is made of re interpreting past quotations seen as relevant for environmental architecture No definitive conclusions are reached but rather broad discursive messages are offered The text will have lasting luminance for new generations involved with the built environment
