Mapping The Political Landscape An Introduction To Political Science:

Mapping the Political Landscape Reeta Chowdhari Tremblay, 2012 Teaching Political Science to Undergraduates Laure Paquette, 2016-01-15 By 2020 half of the world's population and most university students will have a supercomputer in their pockets. This revolution will affect the way students respond to higher education. The university classroom must henceforth engage students and the classic lecture format alone might not be enough to do so. This book answers the question how university students can learn in the classroom what they cannot learn in any other way. The answer is inspired by options that are not available to political scientists in the way that they are in the laboratories for the sciences in the performances for the live arts and in the studios for visual arts as well as ideas that are already present but not widespread in the discipline: problem solving and case studies as in the professional schools and simulation exercises in many other disciplines. This book proposes therefore an active pedagogy for political science at a time when active pedagogy is more important than ever. Prof Laure Paquette PhD has been a visiting researcher or professor in 23 countries. She has advised several foreign governments as well as her own Canada and has published extensively in four languages. This is her sixteenth book. Canadian Books in Print. Author and Title Index, 1975 *How to Map Arguments in Political Science* Craig Parsons, 2007-04-19 As essential and accessible introduction and critique of the main types of explanation in political science. Essential reading for students and scholars alike. **The Political Economy of Natural Resource Funds** Eyene Okpanachi, Reeta Chowdhari Tremblay, 2021-08-13 This book aims to foster a better understanding of the particular challenges faced by resource dependent countries or jurisdictions in managing their resource revenues through natural resource funds (NRFs). It explores the varieties of natural resource management strategies as dictated primarily by domestic politics and how the potential negative distributional consequences of resource wealth management (the resource curse) may add political dimensions and potential conflicts to decisions about NRFs in ways that other sovereign wealth funds (SWFs) do not experience. By bridging the existing academic and practical knowledge gap arising from the limited attention given to the domestic politics of NRFs and state-society relations, this edited book is a valuable resource for academics, policymakers and civil society actors in resource driven economies and especially those interested in learning from comparative experiences of natural resource wealth management through NRFs. **Theory and Methods in Political Science** Vivien Lowndes, David Marsh, Gerry Stoker, 2017-09-28 A broad ranging and pluralistic textbook which highlights the rich variety of approaches to studying politics. Written by an international team of experts, this fully revised fourth edition offers cutting edge coverage from fundamental to contemporary issues. Integrating guides to further reading and clear examples of how research methods can be applied, it enables readers to feel confident about taking their study of politics forward. An ideal foundation for study and research in political science, this textbook will be essential to students at any stage of their degree. It serves as core reading on undergraduate and postgraduate political analysis theory and methods courses. In demonstrating how

independent research is undertaken in political science the book allows students and early career researchers to begin thinking about formulating their own research agendas This new edition Leads the way with fresh new ideas and perspectives with the help of new co editor Vivien Lowndes Includes new chapters on post structuralism as a theoretical approach and on big data as a methodological resource Offers an international perspective on political science with discussion of global as well as domestic politics and a range of international cases and examples

Transitional Justice and the Arab Spring Kirsten Fisher,Robert Stewart,2015-03-24 This book presents a varied and critical picture of how the Arab Spring demands a re examination and re conceptualization of issues of transitional justice It demonstrates how unique features of this wave of revolutions and popular protests that have swept the Arab world since December 2010 give rise to distinctive concerns and problems relative to transitional justice The contributors explore how these issues in turn add fresh perspective and nuance to the field more generally In so doing it explores fundamental questions of social justice reconstruction and healing in the context of the Arab Spring Including the perspectives of academics and practitioners Transitional Justice and the Arab Spring will be of considerable interest to those working on the politics of the Middle East normative political theory transitional justice international law international relations and human rights

Diversity in Decline? Arjun Tremblay,2018-12-28 In this book Arjun Tremblay considers the future of multiculturalism contextualised within an ideological and political shift to the right Is there any hope that multiculturalism will survive alongside the rise of the political right across democracies How can policy makers continue to recognize and to accommodate minorities in an increasingly inhospitable ideological environment Based on evidence from three case studies Tremblay develops a hypothesis of multicultural outcomes arguing that while the threat to multiculturalism is real there still is hope and that not only is the fate of minority rights in liberal democracies far from sealed but it may still be possible to further protect the rights of immigrant and other minority groups in years to come In order to do this proponents of diversity politics may need to reconceptualise multiculturalism and other minority rights along instrumental lines as a means to fulfil policy objectives above and beyond the recognition and accommodation of immigrant minorities This will be an important read for scholars interested in minority rights multiculturalism diversity politics comparative politics institutionalism right wing and far right studies and public policy

Environment and Planning, 2007

Mapping the Germans Jason D. Hansen, 2015-01-22 Mapping the Germans explores the development of statistical science and cartography in Germany between the beginning of the nineteenth century and the start of World War One examining their impact on the German national identity It asks how spatially specific knowledge about the nation was constructed showing the contested and difficult nature of objectifying this frustratingly elastic concept Ideology and politics were not themselves capable of providing satisfactory answers to questions about the geography and membership of the nation rather technology also played a key role in this process helping to produce the scientific authority needed to make the resulting maps and statistics realistic In this sense Mapping the Germans is about how the abstract idea of the nation was transformed into a something that seemed objectively measurable and politically manageable Jason Hansen also examines the birth of radical nationalism in central Europe advancing the novel argument that it was changes to the vision of nationality rather than economic anxieties or ideological shifts that radicalized nationalist practice at the close of the nineteenth century Numbers and maps enabled activists to see nationality in local and spatially specific ways enabling them to make strategic decisions about where to best direct their resources In essence they transformed nationality into something that was actionable that ordinary people could take real actions to influence

Business Lobbying in the European Union David Coen, Alexander Katsaitis, Matia Vannoni, 2021-02-16 At a time when Europe and business stand at crossroads, this study provides a perspective into how business representation in the EU has evolved and valuable insights into how to organize lobbying strategies and influence policy making. Uniquely, the authors analyze business lobbying in Brussels by drawing on insights from political science, public management, and business studies. At the macro level, we explore over 30 years of increasing business lobbying and explore the emergence of a distinct European business-government relations style. At the meso level, we assess how the role of EU institutions, policy types, and the policy cycle shape the density and diversity of business lobbying activity. Finally, at the micro level, we seek to explore how firms organize their political affairs, functions, and mobilized strategic political responses. The study uses a variety of methods to analyze the business-government relations, drawing on unique business and policy maker surveys in depth, case studies, and elite interviews, large statistical analysis of lobbying registers to assess density and diversity across policy areas and EU institutions, and managerial career path and organizational analysis to assess corporate political capabilities. In contributing to discussions on corporate political strategy and interest groups activity, this monograph should be of interest to public policy scholars, policy makers, and businesses managers seeking to understand EU government affairs and political representation.
