Shipping Performance Management Photis M. Panayides, 2023-10-31 In the dynamic and volatile shipping industry effective performance management is essential to an organization's success. This book is a practical guide to developing a holistic and comprehensive performance measurement and management system at managerial level in shipping organizations. Companies in the shipping industry must perform well across many facets of the organization to satisfy an array of demands and obligations arising from a complex environment of customers, partners, competitors, and regulators. This book shows how companies can develop systems to effectively gauge and monitor organizational performance, including among others strategic, economic, environmental, social, and operational performance. Topics covered include tools and approaches for measuring performance, strategy, and the use of the Balanced Scorecard, the mapping of shipping business strategy, the development of KPIs, cascading of company and departmental objectives and KPIs, and implementation. This guide to performance measurement and management is an important resource for managers in the shipping and maritime transport industry, as well as those aspiring to hone their skills in the art of performance management and decision making.

Commercial Marine Shipping Accidents Workshop Steering Committee on the Risks of Marine Shipping in Canadian Waters, 2016-04-28 Canada's economic and social development has benefited immensely from centuries of marine shipping. Today the industry supports economies from coast to coast, shipping hundreds of millions of tonnes of cargo ranging from fuels to food to consumer goods lining store shelves. The shipping industry is important to the livelihood of Canadians but has also faced increased public scrutiny in recent years. The risks associated with opening the Arctic to greater ship traffic, increasing marine shipments of oil from Canada's oil sands, and the growth in vessel size, especially of container ships, have all contributed to this discussion. Recognizing the need for consensus building research in this area, the Clear Seas Centre for Responsible Marine Shipping asked the Council of Canadian Academies to convene an expert workshop to identify the risks associated with commercial marine shipping in major Canadian shipping regions. The final workshop report, *Commercial Marine Shipping Accidents: Understanding the Risks in Canada*, identifies the risks of commercial marine shipping accidents across Canada's regions and for different cargo types while highlighting gaps in understanding and areas for further research. The workshop report brings together perspectives from academia, government, and industry and is informed by evidence from a survey of the marine shipping community and an extensive review of the existing literature. It can be used as a tool for policy makers to help inform decisions related to managing the risks of commercial marine shipping accidents. Overall, this workshop report seeks to contribute to a national dialogue about acceptable levels of risk in commercial marine shipping.
