Najork, 2021-02-08 Mar u saga the Old Norse Icelandic life of the Virgin Mary survives in nineteen manuscripts While the 1871 edition of the saga provides two versions based on multiple manuscripts and prints significant variants in the notes it does not preserve the literary and social contexts of those manuscripts In the extant manuscripts Mar u saga rarely exists in the codex by itself This study restores the saga to its manuscript contexts in order to better understand the meaning of the text within its manuscript matrix why it was copied in the specific manuscripts it was and how it was read and used by the different communities that preserved the manuscripts

Despite the well-known fact that paper was crucial to the success of printing and record-keeping, alike, paper remains one of the least studied areas of early modern history. Organised into three sections: Hotspots and Trade Routes, Usual Dealings and Recycling Economies, the chapters in this collection shed light on the practices, materials, and networks of the paper trade. Altogether, the collection uncovers the actors involved in the networks of paper production, transportation, purchase, and reuse between the thirteenth and nineteenth centuries and across the central and peripheral papermaking regions of Europe. Contributors: Renaud Adam, Daniel Bellingradt, Frank Birkenholz, Simon Burrows, Orietta Da Rold, Michael Falk, Anna Gialdini, Rachel Hendery, Silvia Hufnagel, Jean Beno t Krümenacker, Katherine McDonough, Krisztina R. Bai, Anna Reynolds, Benito Rial, Costas Tapio, Salminen, Helen Smith, Jan Willem Veluwenkamp, Andreas Weber, and Megan Williams. New Studies in the Manuscript Tradition of Njáls saga Svanhildur Óskarsdóttir, Emily Lethbridge, 2018-10-22 Njáls saga is the best known and most highly regarded of all medieval Icelandic sagas, and it occupies a special place in Icelandic cultural history. The manuscript tradition is exceptionally rich and extensive. The oldest extant manuscripts date to only a couple of decades after the saga's composition in the late 13th century, and the saga was subsequently copied by hand continuously up until the 20th century, even alongside the circulation of printed text editions in latter centuries. The manuscript corpus as a whole has great socio-historical value, showcasing the myriad ways in which generations of Icelanders interpreted the saga and took an active part in its transmission; the manuscripts are also

valuable sources for evidence of linguistic change and other phenomena The essays in this volume present new research and a range of interdisciplinary perspectives on the Nj ls saga manuscripts Many of the authors took part in the international research project The Variance of Nj ls saga which was funded by the Icelandic Research Council from 2011 2013

Between Manuscript and Print Sylvia Brockstieger,Paul Schweitzer-Martin,2023-07-24 A cross cultural comparative view on the transition from a predominant culture of handwriting to a predominant culture of print in the late medieval and early modern periods is provided here combining research on Christian and Jewish European book culture with findings on East Asian manuscript and print culture This approach highlights interactions and interdependencies instead of retracing a linear process from the manuscript book to its printed successor While each chapter is written as a disciplinary study focused on one specific case from the respective field the volume as a whole allows for transcultural perspectives It thereby not only focusses on change but also on simultaneities of manuscript and printing practices as well as on shifts in the perception of media writing surfaces and materials Which values did writers printers and readers attribute to the handwritten and printed materials For which types of texts was handwriting preferred or perceived as suitable How and under which circumstances could handwritten and printed texts coexist even within the same document and which epistemic dynamics emerged from such textual assemblages
