Unforgettable W. Michael Gray, 2016-10-12 We have an uneasy relationship with the relentless deluge of information gushing out of academia and our media outlets To turn it off is escapist but to attempt to cognitively grapple with it is overwhelming In Unforgettable Enabling Deep and Durable Learning a nationally recognized master teacher gives professors and their students the means to chart a clear path through this information explosion Humans crave explanatory patterns and this book enables teachers to think deeply about their

academic disciplines to find and articulate their core explanatory principles and to engage their students in a compelling way of thinking. An alternative title for this book could be *Why the Best College Teachers Do What They Do* because the author articulates a compelling rationale that will equip faculty to create and deliver transformative courses. Students in transformative courses grapple with essential questions and gain mental muscle that equips them for real world challenges.

Visualizing Research Carole Gray, Julian Malins, 2016-02-11 *Visualizing Research* guides postgraduate students in art and design through the development and implementation of a research project using the metaphor of a journey of exploration. For use with a formal programme of study from masters to doctoral level, the book derives from the creative relationship between research practice and teaching in art and design. It extends generic research processes into practice-based approaches more relevant to artists and designers, introducing wherever possible visual, interactive and collaborative methods. The Introduction and Chapter 1 *Planning the Journey* define the concept and value of practice-based formal research, tracking the debate around its development and explaining key concepts and terminology. *Mapping the Terrain* then describes methods of contextualizing research in art and design, the contextual review using reference material, *Locating Your Position* and *Crossing the Terrain* guide the reader through the stages of identifying an appropriate research question and methodological approach, writing the proposal and managing research information. Methods of evaluation and analysis are explored and strategies for reporting and communicating research findings are suggested. Appendices and a glossary are also included. *Visualizing Research* draws on the experience of researchers in different contexts and includes case studies of real projects. Although written primarily for postgraduate students, research supervisors, managers and academic staff in art and design and related areas such as architecture and media studies will find this a valuable research reference. An accompanying website www.visualizingresearch.info includes multimedia and other resources that complement the book.
