Gender in Spanish Urban Spaces Maria C. DiFrancesco, Debra J. Ochoa, 2018-01-03 This edited collection examines the synergistic relationship between gender and urban space in post millennium Spain Despite the social progress Spain has made extending equal rights to all citizens particularly in the wake of the Franco regime and radically liberating Transición the fact remains that not all subjects particularly women immigrants and queers possess equal autonomy The book exposes visible shifts in power dynamics within the nation's largest urban capitals Madrid and Barcelona and takes a hard look at more peripheral bedroom communities as all of these spaces reflect the discontent of a post nationalistic economically unstable Spain As the contributors problematize notions of public and private space and disrupt gender binaries related with these they aspire to engender discussion around civic status the administration of space and the place of all citizens in a global world

Environmental performance of pig supply chains: Guidelines for assessment (Version 1) Food and Agriculture Organization of the United Nations, 2018-02-23 This is a living document produced by the

Livestock Environmental and Assessment Performance LEAP Partnership The document presents a methodology and provides guidance for the assessment of the environmental performance of pig supply chains It provides users guidance on how to apply the life cycle assessment approach to pig supply chains Demand for livestock products is projected to grow 1.3 percent per year until 2050 driven by global population growth and increasing wealth and urbanization This projected growth places significant pressure on the livestock sector to perform in a more sustainable way Currently many different methods are used to assess the environmental impacts and performance of livestock products This causes confusion and makes it difficult to compare results and set priorities for continuing improvement The intention of this document is to provide an overview assessment of existing studies and associated methods that have used life cycle assessment for the evaluation of pig supply chains

Nutrient Flows and associated environmental impacts in livestock supply chains.

Guidelines for assessment Food and Agriculture Organization of the United Nations, 2018-09-27 The aim of the methodology developed in these guidelines is to introduce a harmonized international approach assessing nutrient flows and impact assessment for eutrophication and acidification for livestock supply chains taking the specificity of the various production systems involved into consideration The methodology strives to increase understanding of nutrient use efficiency and associated environmental impacts and to facilitate the improvement of livestock systems environmental performance The guidelines are a product of the Livestock Environmental Assessment and Performance LEAP Partnership a multi stakeholder initiative whose goal is to improve the environmental sustainability of livestock sector through better metrics and data Nutrient use in livestock production systems increased over the last decades due to the increased demand for livestock production This demand is mainly driven by the increase in the population growth population income and urbanization Consequently in livestock supply chains nutrient losses into the environment have contributed to environmental burdens such as climate change air and water pollution degradation of soil quality loss of biodiversity and human health issues Therefore there is strong interest in measuring nutrient flows to improve the environmental performance of the livestock sector The objectives of these guidelines are To develop a harmonized science based approach resting on a consensus among the sector's stakeholders To recommend a scientific but at the same time practical an approach that builds on existing or developing methodologies To promote a harmonised approach to assess nutrient flows and impact assessment relevant for global livestock supply chains To identify the principal areas where ambiguity or differing views exist concerning the methodological framework During the development process these guidelines were submitted for technical review and public review The purpose is to strengthen the advice provided and ensure it meets the needs of those seeking to improve nutrient use efficiency and environmental performance through sound assessment practice This document is not intended to remain static It will be updated and improved as the sector evolves and more stakeholders become involved in the LEAP and as new methodological frameworks and data become available The guidelines developed by the LEAP Partnership gain strength

because they represent a multi actor coordinated cross sectoral and international effort to harmonize assessment approaches Ideally the harmonization leads to greater understanding transparent application and communication of metrics and not least real and measurable improvement in environmental performance Assessment in Student Affairs John H. Clinical Neuropsychology Mark E. Maruish, James A. Moses, 2013-05-13 With the emergence of clinical neuropsychology as one of the fastest growing specialties in psychology comes the need for current and future practitioners to stay abreast of the most recent research A number of professional journals more than adequately meet this need But there is also a need to stay up to date on the current thinking about important problems Drawing upon the expertise of leaders in the field the editors intent in this book was to provide the practitioner with a source for discussions of topics that are vital to their ongoing development as clinical neuropsychologists but that generally are not addressed in the literature to any great degree

Integration of environment and nutrition in life cycle assessment of food items: Opportunities and challenges McLaren, S., Berardy, A., Henderson, A., Holden, N., Huppertz, T., Jolliet, O., De Camillis, C., Renouf, M., Rugani, B, 2021-12-23 This report is the outcome of a consensus building project to agree on best practices for environmental and nutritional Life Cycle Assessment nLCA methodology and identify future research needs The project involved 30 nutritional and environmental LCA researchers from 18 countries It focused on the assessment of food items as opposed to meals or diets Best practice recommendations were developed to address the intended purpose of an LCA study and related modeling approach choice of an appropriate functional unit assessment of nutritional value and reporting nLCA results An nLCA study should report the quantities of as many essential nutrients as possible and aim to provide information on the nutritional quality and or health impacts in addition to nutrient quantities Outstanding issues requiring further research attention include defining a minimum number of nutrients to be considered in an nLCA study treatment of nutrients to limit use of nutrient indexes further development of Impact Assessment methods representation of nutritional changes that may occur during subsequent distribution and food preparation in cradle to gate nLCA studies and communication of data uncertainty and variability More data are required for different regions particularly developing countries for the processing distribution retail and consumption life cycle stages and for food loss and waste Finally there is a need to extend nLCA methodology for the assessment of meals and diets to consider further how to account for the multi functionality of food in a sustainability framework and to set nLCA studies within the

context of environmental limits These results provide a robust basis for improving nLCA methodology and applying it to identify solutions that minimize the trade offs between nourishing populations and safeguarding the environment
