**Governance and Leadership in Shrinking Cities** Stanisław Mazur,2023-08-24 The aim of this publication is to look in depth at depopulation a trend that is affecting an increasing number of cities worldwide It has recently become a critical issue with a range of detrimental social economic spatial and financial consequences However attempts by central and local governments to combat depopulation have yet to yield satisfactory results Compelling evidence suggests that one of the reasons for this state of affairs is that the role of local urban leadership in devising solutions mobilizing resources and creating networks to address the problem has been underestimated Moreover according to the authors of this monograph there is a significant positive correlation between urban leadership and the ability to effectively respond to and counteract the negative effects of depopulation Without an understanding of the impact of urban leadership on the ability to address the negative consequences of urban depopulation it is impossible to pursue effective public policies in this regard This book presents a novel approach to explaining the ability of cities to combat depopulation through the prism of urban leadership quality It compares domestic empirical research findings with international case studies and offers a comprehensive review of valuable practices to counter urban shrinkage and depopulation from both academic and practical perspectives Further the book provides a new interpretation of the processes associated with these trends The magnitude of the phenomenon in question the negative spatial economic and social consequences as well as the relatively low effectiveness of policies aimed at its mitigation will make this book an invaluable guide for researchers and students from a wide range of disciplines including urban studies economics public management leadership studies local government climate change and energy transition and urban movements The audience will also comprise of policymakers and urban experts such as sociologists

Drawing on a detailed case study of Scotland's National Health Service this book argues that debates about citizen participation in health systems are disproportionately dominated by techniques of invited participation A system's eye perspective while often well intentioned has blinded us to other standpoints for understanding the complex relationship between publics and their health systems *Publics and Their Health Systems* takes a citizen's eye perspective exploring not only conventional invited participation but also the realms of representative democracy contentious protest politics and the micro level tactics used by individual citizens in their encounters with health services The book highlights more oppositional dynamics than those which characterise much invited participation and argues that understanding these is a crucial step towards a more inclusive and democratic health system      **E-government in Europe** Paul G. **Being Political** Jack Corbett, 2015-01-31 Politicians everywhere tend to attract cynicism and inspire disillusionment They are supposed to epitomize the promise of democratic government and yet invariably find themselves cast as the enemy of every virtue that system seeks to uphold In the Pacific politician has become a byword for corruption graft and misconduct This was not always the case the independence generation is still remembered as strong leaders but today's leaders are commonly associated with malaise and despair Once heroes of self determination politicians are now the targets of donor attempts to institute good governance while Fiji's 2006 coup was partly justified on the grounds that they needed cleaning up But who are these much maligned figures How did they come to arrive in politics What is it like to be a politician Why do they enter stay and leave Drawing on more than 110 interviews and other published sources including autobiographies and biographies *Being Political* provides a collective portrait of the region's political elite This is an insider account of political life in the Pacific as seen through the eyes of those who have done the job We learn that politics is a messy unpredictable and at times dirty business that nonetheless inspires service and sacrifice We come to understand how being a politician has changed since independence and consider what this means for how we think about issues of corruption and misconduct We find that politics is deeply embedded in the lives of individuals families and communities an account that belies the common characterization of democracy in the Pacific as a facade or foreign flower Ultimately this is a sympathetic counter narrative to the populist critique We come to know politicians as people with hopes and fears pains and pleasures vices and virtues A reminder that politicians are human neither saints nor sinners is timely given the wave of cynicism and disaffection As such this book is a must read for all those who believe in the promise of representative government
