scrutiny as the international community seeks to meet the multi dimensional challenges of building a just and sustainable peace in societies ravaged by war Beyond the strictly operational dimension there is considerable ambiguity in the concepts and terminology used to discuss post conflict peacebuilding This ambiguity undermines efforts to agree on common understandings of how peace can be most effectively built thereby impeding swift coherent action Accordingly this lexicon aims to clarify and illuminate the multiple facets of post conflict peacebuilding by presenting its major themes and trends from an analytical perspective To this end the book opens with a general introduction on the concept of post conflict peacebuilding followed by twenty six essays on its key elements including capacity building conflict transformation reconciliation recovery rule of law security sector reform and transitional justice Written by international experts from a range of disciplines including political science and international relations international law economics and sociology these essays cover the whole spectrum of post conflict peacebuilding In reflecting a diversity of perspectives the lexicon sheds light on many different challenges associated with post conflict peacebuilding For each key concept a generic definition is proposed which is then expanded through discussion of three main areas the meaning and origin of the concept its content and essential components and its means of implementation including lessons learned from past practice Building Environmental Peace Natalia Dalmer,2022-03-17 By analyzing the UN Environment Programme s UNEP s contribution to peacebuilding this book aims to show how international bureaucracies develop knowledge and thereby come to matter on the world stage Portraying UNEP as an open system it explores how a growing understanding within the Programme of how environmental degradation shapes insecurities and vice versa has motivated its work on peacebuilding The theoretical part of this book addresses knowledge open systems and knowledge creation It then presents a historical discussion of UNEP s development in an open system context Finally it investigates how knowledge emergence on the linkage between the environment conflicts and insecurities influenced UNEP s interests and its work on environmental peacebuilding
