Multicultural Child Care Paul Vedder, Ellen Bouwer, Trees Pels, 1996 What is the state of multicultural education in child care centres in Western European countries What should multicultural education in these centres look like These are the two key questions addressed in this book In this study the authors have analysed the state of multicultural education in child care centres in the Netherlands England Scotland Denmark Sweden Germany Belgium France and Spain The main situation considered here is the Netherlands where the recent and rapid growth of the number of child care centres together with the growing numbers of immigrant children visiting these centres have given a strong impetus to concerns about the quality of centre education from a multicultural perspective For centre staff sensitive responses towards children and parents as well as parental involvement have become essential for managing cultural diversity in a way beneficial for both migrant and indigenous families It is argued that defining and improving the quality of centre education from a multicultural perspective require discussions between staff and parents about educational goals and the means to achieve them The book gives recommendations for improving the relationship between staff and parents by way of consensus building about these aims

Software Durability Rajeev Kumar, Suhel Ahmad Khan, Raees Ahmad Khan, 2023-04-13 Software evolution is a time consuming and costly process due to its complex architecture. Software designers need to produce software that is effective as well as durable. Durability and effectiveness of software are the foremost priorities and challenges for developers. This book comprises real life case studies of durability issues and their solutions that bring to light loopholes and show how to fix them to enhance durability. Existing literature on software durability tells us that the first step is to recognise the problem. It gives information about durability risk estimation, knowledge, and governance based on five main characteristics: dependability, trustworthiness, usability, security, and human trust. The book serves as a complete package to get acquainted with assurance and risk management from a software durability perspective. It enhances our understanding of the concept of durability, its multi-dimensional approach, threats, and their types, risk mitigation techniques, and suggestive measures. The book reviews the emerging trends in the software development process in the context of durability concepts such as automated code reviews, coding standards, and software durability standards, and their testing, cost management solutions, low code or no code solutions, and durability assurance.
