**Governance of Marine Fisheries and Biodiversity Conservation** Serge M. Garcia, Jake Rice, Anthony Charles, 2014-07-15 Governance of Marine Fisheries and Biodiversity Conservation explores governance of the world's oceans with a focus on the impacts of two inter connected but historically separate streams of governance one for fisheries the other for biodiversity conservation Chapters most co authored by leading experts from both streams investigate the interaction of these governance streams from ecological economic social and legal perspectives with emphasis on policies institutions processes and outcomes on scales from the global to the local community and with coverage of a range of themes and regions of the world The book opens with chapters setting the historical context for the two marine governance streams and framing the book's exploration of whether as the streams increasingly interact there will be merger or collision convergence or co evolution The concluding chapter synthesizes the insights from throughout the book relative to the questions posed in the opening chapters It also draws conclusions about future needs and directions in the governance of marine fisheries and biodiversity vital to the future of the world's oceans With cutting edge chapters written by many leading international experts in fisheries management and biodiversity conservation and edited by three leading figures in this crucially important subject Governance of Marine Fisheries and Biodiversity Conservation is an essential purchase for fisheries scientists economists resource managers and policymakers and all those working in fields of biodiversity conservation marine ecology and coastal livelihoods Libraries in all universities and research establishments where environmental and or marine studies conservation ocean policy and law biological and life sciences and fisheries management are studied and taught should have copies of this most important book     [Rethinking Fisheries Governance](#)

Hoang Viet Thang, 2017-08-11 This book explores how the state can foster collective action by fisher's communities in fisheries management It presents a different perspective from Elinor Ostrom's classic work on the eight institutional conditions that foster collective action in natural resource management and instead emphasizes the role of the state in fisheries co management engaging a state centric notion of meta governance It argues that first the state is required to foster collective action by fishers and secondly that the current fisheries co management arrangements are state centric The study develops these arguments through the analysis of three case studies in Japan Vietnam and Norway The author also makes a theoretical contribution to governance literature by developing Ostrom's society centric framework in a way which makes it more amenable to the analysis of state capacity and government intervention in a comparative context This book will appeal to students and scholars of global governance fisheries management co management and crisis management as well as practitioners of fisheries management     *International Law for Small-Scale Fisheries* Julia N. Nakamura, 2025-03-27 This book provides an original and groundbreaking account of the applicability and key contributions of international law to small scale fisheries a fisheries subsector that has been historically overlooked by governments and international legal

scholarship Small scale fisheries constitute most of the world's capture fisheries workforce they sustain the livelihoods of fishers and their communities while building and transmitting traditional knowledge and culture Significant attention has been given to small scale fisheries by the international community over the past decade building the momentum for dedicated research on such a topic Nevertheless the literature examining small scale fisheries from an international legal perspective remains scarce This book fills this gap by systemically examining different international legal regimes to unravel the normative foundations for securing the meaningful participation of small scale fisheries peoples in international fisheries management It connects the ecosystem approach a key principle of international fisheries law and the human rights regime to elucidate the benefits that participatory international fisheries management brings to enhance both the ecological and social aspects of fisheries sustainability It also examines the extent to which fisheries governance is democratic and provides an enabling framework for the integration of fishers knowledge into international fisheries management It is thereby oriented toward more justice and fair outcomes for small scale fisheries This book will be a valuable resource for academics and researchers with an interest in the governance of fisheries in international law the law of the sea environmental law and human rights law as well as to practitioners and policymakers working on the development and implementation of laws and policies governing fisheries and natural resources

*Environmental Governance and Common Pool Resources* Michael Faure, Peter Mascini, Jing Liu, 2017-09-07 This book analyses the drivers of specific common pool resource problems particularly in fisheries and forestry examining the way in which private and public regulation have intervened to fight the common pool resource problem by contributing to the establishment and maintenance of property rights It focuses on the various forms of regulation that have been put in place to protect fisheries and forestry over the past decades both from a theoretical as well as from a policy perspective comparing the concrete interaction of legal and policy instruments in eight separate jurisdictions

Governing the Coastal Commons Derek Armitage, Anthony Charles, Fikret Berkes, 2017-04-28 Coastal communities depend on the marine environment for their livelihoods but the common property nature of marine resources poses major challenges for the governance of such resources Through detailed cases and consideration of broader global trends this volume examines how coastal communities are adapting to environmental change and the attributes of governance that foster deliberate transformations and help to build resilience of social and ecological systems Governance here reflects how communities societies and organisations e.g. fisher cooperatives government agencies choose to organise themselves to make decisions about important issues such as the use and protection of coastal commons e.g. fishery resources The book shows how a governance approach generates insights into the specific forms and arrangements that enable coastal communities to steer away from unsustainable pathways It also provides an analytical lens to consider important questions of power knowledge and legitimacy in linked social ecological systems Chapters highlight examples in which communities are engaging in deliberative transformations to build resilience and enhance their well being These

transformations and efforts to build resilience are emerging through multi level collaboration shared learning innovative policies and institutional arrangements such as new property rights regimes and co management methodologies that engage with indigenous cultural practices and entrepreneurial activities including income and livelihood diversification Case studies are included from a range of countries including Canada Japan Brazil Indonesia Mexico South Africa Thailand the South Pacific and Europe The authors integrate theory with practical examples to improve coastal marine policy and governance and draw upon emerging concepts from social ecological resilience and transformations adaptive governance and the scholarship on the commons

*High Seas Governance* Robert C. Beckman, Millicent McCreath, J. Ashley Roach, Zhen Sun, 2018-11-26 *High Seas Governance Gaps and Challenges* identifies gaps in and challenges to the existing legal regime in the protection and preservation of the marine environment of the high seas including sensitive marine areas The gaps identified in the book include the failure of liability and compensation schemes to cover pollution of the high seas and the fact that no state has the responsibility to clean up pollution of the high seas One common theme of the book is that it is necessary to identify a state other than flag states port states or coastal states which should have an obligation to exercise jurisdiction and control over certain activities on the high seas

**Sustainable Fishery Systems** Anthony Charles, 2023-06-20 **SUSTAINABLE FISHERY SYSTEMS** An up to date and interdisciplinary guide to sustainable fisheries Fisheries whether small scale or large

scale are filled with complexity and uncertainty Making the right decisions to successfully manage fisheries for sustainability and resilience requires a systems approach including both natural and human elements and their many interactions To understand fisheries and how they change over time a diverse range of fishery knowledge must be brought together Sustainable Fishery Systems 2nd edition meets these needs The new edition provides essential information that can be readily applied within government community industrial academic and research settings Sustainable Fishery Systems 2nd edition retains the first edition s emphasis on themes such as sustainability resilience uncertainty complexity and conflict and expands its treatment of topics that have since the first edition s publication become crucial to consider in the field of fisheries As a result readers will find Updated and expanded coverage of topics including coastal conservation ecosystem based management co management community based management and more New chapters covering connections between fisheries and marine protected areas biodiversity conservation climate and fisheries and multi sectoral management A more detailed introduction to the systems perspective of fisheries reflecting the substantial growth in that subject s importance and covering in detail the natural human and governance aspects of fisheries Sustainable Fishery Systems 2nd edition is an indispensable interdisciplinary resource for educators researchers government agencies and fisheries managers The Law of the Sea Nele Matz-Lück, Øystein Jensen, Elise Johansen, 2022-09-19 The United Nations Convention on the Law of the Sea follows a comprehensive approach and can be interpreted dynamically to include the regulation of all potential human uses of the ocean but the law of the sea cannot be viewed in isolation from other fields of international law International law does not resemble a hierarchically structured legal system its different parts interact when different rules address the same activity or situation The academic discussion concerning the specialization and proliferation of international legal rules and dispute settlement bodies has theoretical as well as practical relevance for the law of the sea and its interaction with other parts of international law The intensified use of the oceans for different purposes and the ongoing proliferation of international rules addressing different activities from different perspectives and with distinct foci require a more thorough evaluation of how the law of the sea relates to other fields of international law how the normative context can be approached theoretically and if interdisciplinary interfaces can be adequately addressed This book discusses the normative context of the law of the sea and the interactions of the law of the sea with other legal regimes By connecting high quality research with new ideas and perspectives this book offers expertise from different fields and perspectives in which the interaction between the law of the sea and other fields of international law becomes particularly relevant **Interactive Governance for Small-Scale Fisheries** Svein Jentoft, Ratana Chuenpagdee, 2015-05-30 Drawing on more than 30 case studies from around the world this book offers a multitude of examples for improving the governance of small scale fisheries Contributors from some 36 countries argue that reform transformation and innovation are vital to achieving sustainable small scale fisheries especially for mitigating the threats and vulnerabilities of global change For this to happen governing systems must be context specific

and the governability of small scale fisheries properly assessed The volume corresponds well with the Voluntary Guidelines for Securing Sustainable Small Scale Fisheries adopted in 2014 spearheaded by the United Nations Food and Agriculture Organization FAO These affirm the importance of small scale fisheries for food security nutrition livelihoods rural development and poverty reduction The book arises from the project Too Big To Ignore Global Partnership for Small Scale Fisheries Research TBTI A nuanced diverse vibrant and local specific collection of essays just as the small scale fisheries around the world dealt with by this versatile array of authors Following on the heels of the recently adopted FAO Small Scale Fisheries Guidelines here is an erudite compendium which I heartily recommend to policy makers academics and activists who wish to come to terms with the complex issue of governance of this important field of human activity John Kurien Founding Member of the International Collective in Support of Fishworkers ICSF and Former Professor Centre for Development Studies Trivandrum India Likely to become a classic in its field this book is about small scale fisheries and interactive governance governance which is negotiated deliberated upon and communicated among stakeholders who often share governing responsibilities The authors show that interactive governance is not just a normative theory but a phenomenon that can be studied empirically here with 34 case studies from as many countries around the world north and south east and west Such force of example enables the editors to put together well developed arguments and sometimes surprising conclusions about the way ahead A must read for managers practitioners stakeholders and students Fikret Berkes University of Manitoba Canada and author of *Coasts for People* *Sustainable Fisheries Management and International Law* Abdullah-Al Arif, 2021-12-30 This book presents a comprehensive analysis of the legal and policy frameworks for marine fisheries management and examines the efficiency of the institutions responsible for the formulation implementation and enforcement of marine fisheries laws and policies in Bangladesh Sustainable management of marine fisheries is a complex multi dimensional and multi stakeholder process that entails sustainable use of marine living resources and conservation of marine biodiversity Offering a critical analysis to these frameworks that play a crucial role in the conservation and management of fish stocks in areas within and beyond national jurisdiction this book examines inadequacies and implementation gaps in the legislative policy and institutional frameworks that contribute to the unsustainable exploitation of marine fish stocks in Bangladesh It recommends law and policy reform for conservation and sustainable management of marine fisheries in Bangladesh and the Bay of Bengal
