GOVERNANCE INNOVATIONS IN THE ASIA-PACIFIC REGION, 2018 **Governance Innovations in the Asia-Pacific Region** Gambhir Bhatta, Joaquin L. Gonzalez III, 2019-01-15 Published in 1998 The debate on what constitutes good governance and more importantly how to attain it is not a new issue The elusive and pluralistic nature of governance ensures that much more needs to be studied about the specific incidence of good governance before a unifying theme on how exactly to develop a universal framework of application of governance can be finalized It is within this context that this book seeks to fill a vacuum in the theory practice dichotomy that it argues has dominated the debate on governance so far

Governance for Harmony in Asia and Beyond Julia Tao, Anthony B. L. Cheung, Martin Painter, Chenyang Li, 2009-12-18 Harmony has become a major challenge for modern governance in the twenty first century because of the multi religious multi racial and multi ethnic character of our increasingly globalized societies Governments all over the world are facing growing pressure to integrate the many diverse elements and subcultures which make up modern pluralistic societies This book examines the idea of harmony and its place in politics and governance both in theory and practice in Asia the West and elsewhere It explores and analyses the meanings mechanisms dimensions and methodologies of harmony as a normative political ideal in both Western and Asian philosophical traditions The book argues that in Western political thought which sees politics as primarily concerned with resolving social conflicts and protecting individual rights the concept of harmony has often been neglected In contrast since earliest times harmony or he has been a profound theme in Confucian thought and current leaders of many East Asian governments and the Chinese government have explicitly declared that the realisation of a harmonious society is their aim The book also assesses how harmony is pursued jeopardized or deformed in the real world of politics based upon empirical analysis of a variety of different cultural social and political contexts including China Hong Kong Singapore Malaysia Singapore Vietnam Denmark Latin America and the Scandinavian countries It shows how harmony as an organizing concept can help to promote new thinking in governance and overcome problems of modern day governance like distrust adversarial conflicts hyper individualism coercive state intervention and free market alienation It also discusses the potential problems posed by the pursuit of harmony in particular in the grave threat of totalitarianism and considers how these risks could best be mitigated Common Foundations of American and East Asian Modernisation Ian Patrick

either being harmed or at least not helped Are the good things that globalization produces whatever they are widely shared What processes lead us in one direction or another This book examines a key dimension of globalization its fairness It investigates the meaning of and role fairness plays when public institutions are faced with the challenges and opportunities of globalization Here a distinguished group of contributors including both academics and practitioners focuses on East and Southeast Asia but the relevance of the issues discussed extends well beyond these regions They present a broad ranging examination of the intersections between fairness globalization and public institutions Contributors Doug Allen Walt T Anderson Ron Brown Jim Dator Jingping Ding Christopher Grandy Sohail Inayatullah Yong duck Jung Martin Khor Yoshiko Kojo Le Van Anh Ivana Milojevic Ryo Oshiba Edgar A Porter Dick Pratt Fred Riggs James Rosenau Yongseok Seo Chanto Sisowath Shunichi Takekawa *Asia and Pacific Bibliography* ,1999 *Democratization through Migration?* Christl Kessler,Stefan Rother,2016-03-10 In migration research studies on the influence of return migrants on the societies in their home countries are still few and predominantly concentrate on the economic dimension of migration The literature on democratization has likewise paid only scant attention to the external factors that play a role in the transition of states in the process of becoming more democratic Cognizant of these lacunae in research on migration and democratization this book sets out to argue that return migrants can play an important role in the consolidation process of young democracies The goal is therefore to explore the nature of this influence and to discuss its stabilizing as well as destabilizing aspects with regards to democratization As a case study this book analyzes labor exporter par excellence the Philippines Research is based on original data a survey in the Philippines with 2 000 respondents 37 in depth interviews with respondents from the sample and 45 expert interviews serving as background material The destinations covered are Saudi Arabia Qatar UAE Taiwan Japan and Hong Kong This book discusses whether labor migration can affect democratization processes and what impact the political order of the host country has on this potential effect It attests the potential of the migration experience to affect migrants attitudes towards democracy thus playing an important role in the support needed for democracies in the stage of consolidation Our findings suggest that the migration experience may not only lead to a more critical stance towards the political system of the home country there are also indicators of lesser support for the principles of democracy when compared to migrants about to leave the country for the first time The political system of the destination as such seems to be a less decisive factor than the specific freedoms and restrictions experienced by migrants and a potential bias when selecting the destination *New Regional Development Paradigms: Decentralization, governance, and the new planning for local-level development* Asfaw Kumssa,T.
