**Decentralizing Governance** G. Shabbir Cheema, Dennis A. Rondinelli, 2007-08-01 The trend toward greater decentralization of governance activities now accepted as commonplace in the West has become a worldwide movement This international development largely a product of globalization and democratization is clearly one of the key factors reshaping economic political and social conditions throughout the world Rather than the top down centralized decisionmaking that characterized communist economies and Third World dictatorships in the twentieth century today's world demands flexibility adaptability and the autonomy to bring those qualities to bear In this thought provoking book the first in a new series on Innovations in Governance experts in government and public management trace the evolution and performance of decentralization concepts from the transfer of authority within government to the sharing of power authority and responsibilities among broader governance institutions This movement is not limited to national government it also affects subnational governments NGOs private corporations and even civil associations The contributors assess the emerging concepts of decentralization e g devolution empowerment capacity building and democratic governance They detail the factors driving the movement including political changes such as the fall of the Iron Curtain and the ascendance of democracy economic factors such as globalization and outsourcing and technological advances e g increased information technology and electronic commerce

Their analysis covers many different contexts and regions For example William Ascher of Claremont McKenna College chronicles how decentralization concepts are playing out in natural resources policy while Kadmeil Wekwete United Nations outlines the specific challenges to decentralizing governance in sub Saharan Africa In each case contributors explore the objectives of a decentralizing strategy as well as the benefits and difficulties that will likely result      **The Role of Local**

Bloch,2018-01-18 Bringing together case studies from Europe Africa and North and South America this book makes a fresh assessment of the role of the individual and the state in land development It discusses a range of issues related to land reform land development and land management providing a unique reflection of the current state of research Particular emphasis is laid on the implementation of sustainable processes of land development as an integrated principle of land management The book examines the rights of the land users and addresses a number of issues relating to sustainability and land development ranging from emerging land markets and environmental issues through to natural resource development The case studies provide practical examples of the application of land reform and land development to land management      **Reforming the Malawian Public Sector** Richard Tambulasi,2010-06-01 Reforming the Malawian Public Sector argues that the new public management model that Malawi like most African countries adopted

under the influence of donor organisations has not led to the intended development. The book examines decentralisation, performance contracting and public-private partnerships as key aspects of the reforms and comes to the conclusion that at best it can be argued that the failures have been due to poor implementation and this could be attributed to the fact that the process was led by donors who lacked the necessary institutional infrastructure. The book uses the 2005 6 fertiliser subsidy programme which the government embarked on despite donor resistance that it went against market models but which turned out to be overwhelmingly successful to demonstrate the state's developmental ability and potential. This volume is essential reading for academics, students and practitioners seeking a deeper understanding of public administration, management, policy development and governance in Africa and the rest of the developing world. The book is dedicated to the memory of Guy Mhone, a Malawian who was among Africa's leading scholars in public administration and governance. His works focused mainly on public sector reforms and development.

**Routledge Handbook of Civil and Uncivil Society in Southeast Asia** Eva Hansson, Meredith L. Weiss, 2023-02-28. The Routledge Handbook of Civil and Uncivil Society in Southeast Asia explores the nature and implications of civil society across the region, engaging systematically with both theoretical approaches and empirical nuance for a systematic comparative and informative approach. The handbook actively analyses the varying definitions of civil society, critiquing the inconsistent scrutiny of this sphere over time. It brings forth the need to reconsider civil society development in today's Southeast Asia, including activist organisations and platforms, composition, claims, resources and potential to effect sociopolitical change. Structured in five parts, the volume includes chapters written by an international set of experts analysing topics relating to civil society: Spaces and platforms; Place within politics; Resources and tactics; Identity formation and claims; Advocacy. The handbook highlights the importance of civil society as a domain for political engagement outside the state and parties across Southeast Asia, as well as the prevalence and weight of uncivil dimensions. It offers a well-informed and comprehensive analysis of the topic and is an indispensable reference work for students and researchers in the fields of Asian Studies, Asian Politics, Southeast Asian Politics and Comparative Politics. **The Future of Ecowas: Critical Perspectives** Mansourou El-Moumin A. Radji, 2020-12-18. The book delves into the regional organization in both form and content and pinpoints why, since 1975, political dysfunction and self-help undermine the economic arrangement within the sub-region. It highlights the most systematic analysis of how policies are half-implemented and laws enacted to move the region forward failed to make any difference. From China's imperialistic ambitions on West Africa, the economic integration to Morocco's attempt and the single currency, Mansourou takes readers deep into political criminality and relies on impressive quantitative analysis to reach compelling and unusual outcomes. He argues against the tide of unnecessary

Chinese Killer loans that is spreading across West Africa      Governance for Harmony in Asia and Beyond Julia Tao,Anthony B. L. Cheung,Martin Painter,Chenyang Li,2009-12-18 Harmony has become a major challenge for modern governance in the twenty first century because of the multi religious multi racial and multi ethnic character of our increasingly globalized societies Governments all over the world are facing growing pressure to integrate the many diverse elements and subcultures which make up modern pluralistic societies This book examines the idea of harmony and its place in politics and governance both in theory and practice in Asia the West and elsewhere It explores and analyses the meanings mechanisms dimensions and methodologies of harmony as a normative political ideal in both Western and Asian philosophical traditions The book argues that in Western political thought which sees politics as primarily concerned with resolving social conflicts and protecting individual rights the concept of harmony has often been neglected In contrast since earliest times harmony or he has been a profound theme in Confucian thought and current leaders of many East Asian governments and the Chinese government have explicitly declared that the realisation of a harmonious society is their aim The book also assesses how harmony is pursued jeopardized or deformed in the real world of politics based upon empirical analysis of a variety of different cultural social and political contexts including China Hong Kong Singapore Malaysia Singapore Vietnam Denmark Latin America and the Scandinavian countries It shows how harmony as an organizing concept can help to promote new thinking in governance and overcome problems of modern day governance like distrust adversarial conflicts hyper individualism coercive state intervention and free market alienation It also discusses the potential problems posed by the pursuit of harmony in particular in the grave threat of totalitarianism and considers how these risks could best be mitigated
