

What is a report?

A report is a structured and formal document that is used to convey information, findings, analysis, and recommendations to a specific audience. Reports are typically used in academic, scientific, technical, and business contexts to communicate the results of research, investigations, or assessments.

A report typically includes several sections such as an executive summary, an introduction, a methodology, findings, analysis, conclusions, and recommendations. Reports may also include tables, charts, graphs, and other visual aids to help convey information effectively.
