Maxim Gorky Tovah Yedlin, 1999-10-30 Maxim Gorky born Aleksei Maksimovich Peshkov in 1868 to the low stratum of Russian society rose to prominence early in life as a writer and publicist Gorky who did not have a formal education became famous in his country and abroad Writing could not satisfy the rebellious Gorky who soon became involved in revolutionary movements After a short period with the populist narodnik movement Gorky became disillusioned with the peasant class and instead he chose the nascent class of workers as the vehicle for change It is as if Gorky and capitalism arrived in Russia together In his view the intelligentsia and the workers would bring about the change in the political social and cultural life of the country Gorky came close to Lenin and the Bolsheviks taking an active part in the Revolution of 1905 and going into an exile that lasted until 1913 Gorky returning home on the eve of World War I and the following revolutions of February and October 1917 became involved in the momentous developments He vehemently opposed Lenin's socialist revolution maintaining that Russia was not ready for it A second exile followed in 1921 After returning in 1928 to Stalin's Soviet Union Gorky was made into an icon with the eye of the inquisition watching over him And here began what is often called The Tragedy of Maxim Gorky He died in 1936 but the circumstances of his death as well as the question whether Gorky is still debated Based on hitherto unavailable primary sources Yedlin has cut through the Gorky legend to show the real person the Gorky of contradictions and oscillations Fascinating reading for scholars and students of Russian history and literature as well as the general public

How to Think Like an Officer Reed Bonadonna, 2020-09-01 The U S military invests heavily in time and resources to train its officers to be leaders in the broadest sense forming them not only in military art and science strategy tactics command etc but also in humanistic knowledge character and values as well as how to apply this education on a lightning fast battlefield or within an inertially slow bureaucracy The military develops its leaders at the service academies and in ROTC programs

through very specific but also broad and deep education a way of thinking that also has wide application in the civilian world not only in various professional fields that need leaders and thinkers but also among military history enthusiasts who want to understand how officers have thought across time and among American citizens who want and really need to understand how our military leaders think how they advise presidents how they lead on the battlefield In a genre busting book that spans Stackpole's two longstanding military programs reference and history Reed Bonadonna describes how officers think how they ought to think how they develop their skills and how they can improve these skills as well as how average civilians and citizens can learn from the example of military officers and their program of education Bonadonna draws from military history from military arts and science from literature and science and more to show how officers develop their critical thinking and problem solving skills A military officer is often called upon to be not only fighter and leader but also negotiator organizer planner and preparer teacher writer scientist and advisor and needs broad learning This is a deeply learned and insightful book one that cites Lincoln Grant Patton Eisenhower Marshall and Churchill as easily as Sun Tzu and Clausewitz not to mention Homer Plato Joseph Conrad Henry James Wilfred Owen Robert Graves George Orwell Ludwig Wittgenstein Joseph Heller Phil Klay and even Jane Austen The book is descriptive as well as prescriptive and should find eager readers inside the military where officers take seriously their professional education and their professional reading lists as well as outside where many look to the military to military reading lists and to military history to glean lessons for life and work
