Minimal Selfhood and the Origins of

Consciousness Rupert Glasgow, 2018-07-10 In *Minimal Selfhood and the Origins of Consciousness* R D V Glasgow seeks to ground the logical roots of consciousness in what he has previously called the minimal self The idea is that elementary forms of consciousness are logically dependent not as is commonly assumed on ownership of an anatomical brain or nervous system but on the intrinsic reflexivity that defines minimal selfhood The aim of the book is to trace the logical pathway by which minimal selfhood gives rise to the possible appearance of consciousness It is argued that in specific circumstances it thus makes sense to ascribe elementary consciousness to certain predatory single celled organisms such as amoebae and dinoflagellates as well as to some of the simpler animals Such an argument involves establishing exactly what those specific circumstances are and determining how elementary consciousness differs in nature and scope from its more complex manifestations

Charles Platkin, 2010-04-29 In the book *THE AUTOMATIC DIET* readers discover how to harness the power of time tested behavior modification techniques and empower themselves to lose weight and keep it off automatically All successful dieters share a common secret to consistently maintain their weight The secret is that they do not have to think about what they are doing Their food choices are instinctual and they already know what to eat when faced with the disastrous dieting situations we all encounter in everyday life Whether it s a cocktail party on an airplane or at an Italian restaurant they know to react and choose wisely *THE AUTOMATIC DIET* takes you step by step through a process of self analysis as well as powerful techniques based on practical steps that you can put to work immediately This easy accessible process will lead you to an understanding of your own patterns of success and failure in managing your weight Platkin then guides you to understand your own motivations and how you can use this knowledge to overcome self defeating habits with positive behaviors you can sustain for a lifetime *THE AUTOMATIC DIET* is founded on the principle of automaticity Automaticity is a psychological term used to describe the unconscious way in which we make choices for our daily behaviors Activities like setting an alarm clock at night putting on shoes before you leave the house buckling your seat belt when you get in a car and remembering how to drive to the office these activities do not require much thought we just do them If we consciously thought about each decision that we make we would be exhausted at the end of a day Through
