Europe's Growth Champion Marcin Piatkowski, 2018 What makes countries rich What makes countries poor Europe s Growth Champion Insights from the Economic Rise of Poland seeks to answer these questions and many more through a study of one of the biggest and least heard about economic success stories Over the last twenty five years Poland has transitioned from a perennially backward poor and peripheral country to unexpectedly join the ranks of the world s high income countries Europe s Growth Champion is about the lessons learned from Poland s remarkable experience the conditions that keep countries poor and the challenges that countries need to face in order to grow It defines a new growth model that Poland and its Eastern European peers need to adopt to grow and catch up with their Western counterparts Poland s economic rise emphasizes the importance of the fundamental sources of growth institutions culture ideas and leaders in economic development It demonstrates that a shift from an extractive society where the few rule for the benefit of the few to an inclusive society where many rule for the benefit of many can be the key to economic success IEurope s Growth Champion asserts that a newly emerged inclusive society will support further convergence of Poland and the rest of Central and Eastern Europe with the West and help to

sustain the region's Golden Age. It also acknowledges the future challenges that Poland faces and that moving to the core of the European economy will require further reforms and changes in Poland's developmental character.

The Palgrave Companion to Cambridge Economics Robert A. Cord, 2017-02-20. Cambridge University has and continues to be one of the most important centres for economics. With nine chapters on themes in Cambridge economics and over 40 chapters on the lives and work of Cambridge economists, this volume shows how economics became established at the university, how it produced some of the world's best known economists including John Maynard Keynes and Alfred Marshall, plus Nobel Prize winners such as Richard Stone and James Mirrlees, and how it remains a global force for the very best in teaching and research in economics. With original contributions from a stellar cast, this volume provides economists, especially those interested in macroeconomics and the history of economic thought, with the first in-depth analysis of Cambridge economics.

Dynamic Development Accounting and Relative Income Traps Patrick A. Imam, Jonathan R. W. Temple, 2024-11. Previous research suggests that economy-wide poverty traps are rarely observed in the data. In this paper, we explore a related hypothesis: low-income countries rarely improve their position relative to the US. Using finite state Markov chains, we show that upwards mobility is indeed limited. Since capital output ratios are similar across countries and human capital is also converging, the persistence of low relative income seems to originate in the persistence of low relative TFP. We study the dynamics of relative TFP and how they interact with absolute levels of human capital, casting new light on the future of convergence.

Ethics and Economics Johan Graafland, 2021-09-30. This textbook applies economic ethics to evaluate the free market system and enables students to examine the impact of free markets using the three main ethical approaches: utilitarianism, principle-based ethics, and virtue ethics. *Ethics and Economics* systematically links empirical research to these ethical questions with a focus on the core topics of happiness, inequality, and virtues. Each chapter offers a recommended further reading list. The final chapter provides a practical method for applying the different ethical approaches to morally evaluate an economic policy proposal and an example of the methodology being applied to a real-life policy. This book will give students a clear theoretical and methodological toolkit for analyzing the ethics of market policies, making it a valuable resource for courses on economic ethics and economic philosophy. Cultural Values, Institutions, and Trust Seung Hyun Kim, Sangmook Kim, 2023-03-03. Using experimental surveys as a primary source, Kim and Kim compare a wide range of developed countries to assess the determinants of generalized social trust. With data from Belgium, France, Italy, Japan, Singapore, South Korea, the Netherlands, and the United States, Kim and Kim present a detailed picture of trust at the individual level across different ethnic groups and across different regions with economic and cultural distinctions. They focus on a range of concepts including generalized trust and familism, causal relationships among cultural values, particularized trust, and institutional trust at the individual level, and

relationships between culture wealth and governance at the macro level In doing so they consolidate substantial quantitative data with rigorous theoretical analysis and advance our understanding of social trust and prosociality in general A valuable resource for researchers and advanced students in political science sociology and social psychology around the world The Oxford Handbook of Women and the Economy Susan L. Averett, Laura M. Argys, Saul D. Hoffman, 2018-05-15 The transformation of women's lives over the past century is among the most significant and far reaching of social and economic phenomena affecting not only women but also their partners children and indeed nearly every person on the planet In developed and developing countries alike women are acquiring more education marrying later having fewer children and spending a far greater amount of their adult lives in the labor force Yet because women remain the primary caregivers of children issues such as work life balance and the glass ceiling have given rise to critical policy discussions in the developed world In developing countries many women lack access to reproductive technology and are often relegated to jobs in the informal sector where pay is variable and job security is weak Considerable occupational segregation and stubborn gender pay gaps persist around the world The Oxford Handbook of Women and the Economy is the first comprehensive collection of scholarly essays to address these issues using the powerful framework of economics Each chapter written by an acknowledged expert or team of experts reviews the key trends surveys the relevant economic theory and summarizes and critiques the empirical research literature By providing a clear eyed view of what we know what we do not know and what the critical unanswered questions are this Handbook provides an invaluable and wide ranging examination of the many changes that have occurred in women's economic lives *Boosting Productivity in Sub-Saharan Africa* Cesar Calderon, 2021-12-17 The rising concentration of extreme poverty in Sub Saharan Africa over the past quarter century can be attributed to the fact that economic growth has been slow productivity levels are still low and growth has not been inclusive enough to put a big dent in poverty What explains the dismal performance on labor productivity in Sub Saharan Africa compared with the rest of the developing world This report argues that first physical capital is scarce and economic activities in the region have low capital intensity relative to other regions Second although human capital levels were relatively similar in Sub Saharan Africa relative to a group of East Asian Pacific countries in 1960 insufficient investment and poor outcomes led not only to relatively lower levels but also to low quality of human capital Finally scarce resources compounded by the inefficiencies in their allocation across productive units with different levels of productivity translated into low aggregate labor productivity Sub Saharan Africa needs policies to boost productivity across all sectors of economic activity especially in those sectors in which most poor people make their living The region needs policies that improve productivity in the agriculture sector foster rural development and create jobs for youth who are joining the labor force **OECD Reviews of Innovation Policy: Kazakhstan 2017** OECD, 2017-07-10 This report provides an independent and comparative assessment of the overall performance of Kazakhstan's innovation system since independence with recommendations on improving

performance drawing on the experience of other OECD countries in innovation processes systems and policies While **A Mandate to Grow** Eduardo A. Cavallo, Andrew Powell, 2018-03-15 The 2018 Macroeconomic Report A Mandate to Grow revisits the growth debate that has been raging in the region for the past half century Viewing the debate from this long term perspective allows for a focus on the structural factors that have prevented Latin America and the Caribbean from reaching the growth potential required to keep pace with faster growing regions and to fulfill the aspirations of its population

Cognitive Capitalism Heiner Rindermann, 2018-02-15 This book studies cross country differences in cognitive capital exploring how levels of education are linked to a nation's economic development It is for graduates and research in a wide range of fields including economics psychology sociology and political science **Digital Africa** Tania Begazo, Moussa Blimpo, Mark Dutz, 2023-04-04 All African countries need better and more jobs for their growing populations Digital Africa Technological Transformation for Jobs shows that broader use of productivity enhancing digital technologies by enterprises and households is imperative to generate such jobs including for lower skilled people At the same time broader use can support not only countries short term objective of postpandemic economic recovery but also their vision of economic transformation with more inclusive growth These outcomes are not automatic however Mobile internet availability has increased throughout the continent in recent years but Africa's uptake gap is the highest in the world Areas with at least 3G mobile internet service now cover 84 percent of country populations averaged across Sub Saharan Africa but only 22 percent use such services The average African business lags in the use of smartphones and computers as well as more sophisticated digital technologies that catalyze further productivity gains Two issues explain the usage gap the affordability of these new technologies and the willingness to use them For the 40 percent of Africans below the extreme poverty line mobile data plans alone would cost one third of their incomes in addition to the price of access devices apps and electricity Data plans for small and medium businesses are also more expensive than in other regions Moreover shortcomings in the quality of internet services and in the supply of attractive skill appropriate apps that promote entrepreneurship and raise earnings dampen people's willingness to use them For those countries already using these technologies the development payoffs are significant New empirical studies for this report add to the rapidly growing evidence that mobile internet availability directly raises enterprise productivity increases jobs and reduces poverty across Africa To realize these and other benefits more widely Africa's countries must implement complementary and mutually reinforcing policies to strengthen both consumers ability to pay and willingness to use digital technologies These interventions must prioritize productive use to generate large numbers of inclusive jobs in a region poised to benefit from a massive youthful workforce one projected to become the world's largest by the end of this century Sustainable Growth in the EU Luigi Paganetto, 2017-05-26 This book explores the diverse challenges facing the EU and in particular examines the impediments to financial stability and sustainable growth and how these can be overcome Among the topics explored are the extent to which monetary union has favored real convergence

competitive imbalances in the eurozone and the impacts of austerity measures Potential solutions are closely scrutinized highlighting the need for linked fiscal monetary credit and investment choices Opportunities for public and private investment in infrastructure human capital the environment and innovation are emphasized as is the role of fiscal stimulus targeting aggregate demand and output Detailed attention is paid to the importance of coordination of macroeconomic policies and the scope for reforms in EMU design and EU governance In this context the proposals in the recent Five Presidents Report are assessed along with other ideas regarding progressive steps aimed at closer economic financial and political union in the medium to long term Readers will also find separate scrutiny of the Greek crisis and the effectiveness of the third economic adjustment programme The book comprises a selection of contributions presented at the XXVIII Villa Mondragone International Economic Seminar

2014 Annual Provincial And Regional Competitiveness Analysis For Greater China Economies: Development Strategies Under The New Normal Khee Giap Tan, Randong Yuan, Sangiita Wei Cher Yoong, 2015-11-09 After more than three decades of rapid growth China is now entering into the New Normal Era which will be characterised by slower but sustainable quality growth for several decades to come How China will fare under the New Normal Era matters not only for itself but also for its great impact on global prosperity While presenting as the second instalment of ACI's annual tracking of the dynamics of competitiveness among 34 Greater China economies this volume also includes the results of the inaugural regional competitiveness analysis for five regions of Greater China As regional imbalance in socioeconomic advancement is a serious issue China has to face up to under the New Normal Era the results of such competitiveness analysis at provincial and regional levels offer insights for policy makers to help address concerns associated with the regional disparity in development and facilitate industry leaders and other stakeholders in identifying challenges and opportunities for sound decision making
