Handbook of Borderline Personality Disorder in Children and Adolescents Carla Sharp, Jennifer L. Now a recent upsurge in relevant research into early onset BPD is inspiring the field to move beyond this hesitance toward a developmentally nuanced understanding of the disorder. The Handbook of Borderline Personality Disorder in Children and Adolescents reflects the broad scope and empirical strengths of current research as well as promising advances in treatment. This comprehensive resource is authored by veteran and emerging names across disciplines including developmental psychopathology, clinical psychology, child psychiatry, genetics, and neuroscience in order to organize the field for an integrative future. Leading edge topics range from the role of parenting in the development of BPD to trait-based versus symptom-based assessment approaches, from the life course trajectory of BPD to the impact of the DSM 5 on diagnosis. And of particular interest are the data on youth modifications of widely used adult interventions, with session excerpts. Key areas featured in the Handbook: The history of research on BPD in childhood and adolescence; Conceptualization and assessment issues; Etiology and core components of BPD; Developmental course and psychosocial correlates; Empirically supported treatment methods; Implications for future research, assessment, and intervention. The Handbook of Borderline Personality Disorder in Children and Adolescents is a breakthrough reference for researchers and clinicians in a wide range of disciplines including child and school psychology and psychiatry, social work, psychotherapy, and counseling, nursing, management, and research, and personality and social psychology.
