Why do we continue to use Hippocrates and how are new myths constructed around his name How do news stories and the internet contribute to our picture of him And what can this tell us about wider popular engagements with the classical world today in memes quotes and online

The Life and Times of Hippocrates Jim Whiting, 2007-03 For many centuries in ancient history people believed illnesses were handed down by the gods In the fifth century BCE a Greek physician named Hippocrates changed that attitude He began looking for natural causes of illnesses Many of his treatment methods seem primitive For example he performed brain surgery by drilling into a patient s skull with a sharp piece of wood There were no anesthetics It was a very painful procedure In other ways his methods have held up surprisingly well Like modern doctors Hippocrates emphasized the value of a good diet and plenty of exercise He also used maggots leeches and bees to treat his patients All three of these creatures are still being used by doctors even in the United States Because of his efforts today Hippocrates is known as the Father of Medicine
