**Intersectionality** Roland Betancourt, 2020-10-06 Intersectionality, a term coined in 1989, is rapidly increasing in importance within the academy as well as in broader civic conversations. It describes the study of overlapping or intersecting social identities such as race, gender, ethnicity, nationality, and sexual orientation alongside related systems of oppression, domination, and discrimination. Together, these frameworks are used to understand how systematic injustice or social inequality occurs. In this book, Roland Betancourt examines the presence of marginalized identities and intersectionality in the medieval era. He reveals the fascinating little-examined conversations in medieval thought and visual culture around matters of sexual and reproductive consent, bullying, non-monogamous marriages, homosocial and homoerotic relationships, trans and non-binary gender identifications, representations of disability, and the oppression of minorities. In contrast to contemporary expectations of the medieval world, this book looks at these problems from the Byzantine Empire and its neighbors in the eastern Mediterranean through sources ranging from late antiquity and early Christianity up to the early modern period. In each of five chapters, Betancourt provides short, carefully scaled narratives used to illuminate nuanced and surprising takes on now-familiar subjects by medieval thinkers and artists. For example, Betancourt examines depictions of sexual consent in images of the Virgin, the origins of sexual shaming and bullying in the story of Empress Theodora, early beginnings of trans history as told in the lives of saints who lived portions of their lives within different genders, and the ways in which medieval authors understood and depicted disabilities. Deeply researched, this is a groundbreaking new look at medieval culture for a new generation of scholars.

**David Jones and Rome**

Jasmine Hunter Evans, 2022-02-03 This interdisciplinary and archival study explores the reception of ancient Rome in the artistic, literary, and philosophical works of David Jones (1895–1974), the Anglo-Welsh Roman Catholic First World War veteran. For Jones, the twentieth century was a period of crisis, an age of conflict, disillusionment, and cultural decay, all of which he saw as evidence of the decline of Western civilisation. Across his lifetime, Jones would create a dynamic vision of ancient Rome in an attempt both to understand and to challenge this situation. His reimagining of Rome was not founded on a classical education; instead, it was fashioned from his lived experience, extensive reading, and most importantly, his engagement with four areas of contemporary discourse that were themselves built upon intricate and conflicting representations of Rome: British political rhetoric, cyclical history, the Catholic cultural revival, and the Welsh nationalist movement. Tracing Jones's developing approach to Rome across these contexts can provide a way into his art and thought. Whether in his poetic fragments, watercolours, essays, letters, marginalia, or unique painted inscriptions, Jones strove to question, complicate, and remake Rome's relationship with modernity. In this way, Rome appears in Jones's

works both as a symbol of transhistorical imperialism totalitarianism and the mechanisation of life and simultaneously as the cultural and religious progenitor of the West and in particular of Wales with which artists must creatively reconnect if decline was to be avoided *Visualizing the Past in Italian Renaissance Art* Jennifer Cochran Anderson, Douglas N. Dow, 2021-03-22 The essays in *Visualizing the Past in Italian Renaissance Art* address a foundational concept that was as central to early modern thinking as it is to our own that the past is always an important part of the present Written by the friends students and colleagues of Dr Brian Curran former professor of Art History at the Pennsylvania State University these authors demonstrate how reverberations of the past within the present are intrinsic to the ways in which we think about the history of art Examinations of sculpture painting and architecture reveal the myriad ways that history has been appropriated reinvented and rewritten as subsequent generations including the authors collected here have attained new insight into the past and present Contributors Denise Costanzo William E Wallace Theresa A Kutasz Christensen Ingrid Rowland Anthony Cutler Marilyn Aronberg Lavin Louis Alexander Waldman Elizabeth Petersen Cyron Stuart Lingo Jessica Boehman Katherine M Bentz Robin L Thomas and John Pinto **Psychiatric Power** Michel Foucault, 2008-06-24 In *Psychiatric Power* the fourth volume in the collection of his groundbreaking lectures at the Collège de France Michel Foucault addresses and expands upon the ideas in his seminal *Madness and Civilization* sketching the genealogy of psychiatry and of its characteristic form of power knowledge *Madness and Civilization* undertook the archeology of the division according to which in Western Society the madman found himself separated from the sane That book ends with the medicalization of madness at the beginning of the nineteenth century *Psychiatric Power* continues this discourse up to the end of the nineteenth century and the double depsychiatrization of madness now dispersed between the neurologist and the psychoanalyst Presented in a conversational tone *Psychiatric Power* brings fresh access and light to the work of one of the past century's preeminent thinkers **The Encyclopedia of Positive Psychology** Shane J. Garroway, 2018-06-11 In this innovative study Joshua D Garroway offers a revised account of the origin of the all important Christian word gospel yielding significant new insights into the development of early Christian history and literature Long thought to have originated on the lips of Jesus or his disciples gospel was in fact coined by Paul midway through his career to describe his controversial new interpretation of Jesus death and resurrection For nearly a decade after

the crucifixion the thoroughly Jewish Jesus movement demanded circumcision and Law observance from Gentile converts Only in the early 40s did Paul arrive at the belief that such observance was no longer necessary an insight he dubbed the gospel or good news The remainder of Paul s career featured clashes with authorities over the legitimacy of the gospel debates that continued after his death in the writings of Mark Matthew and Luke Acts These writings obscured the original context of the gospel however and in time the word lost its specific association with Paul and his scandalous notion of salvation outside the Law

*Reading Practice* Melissa Reynolds, 2024-08-19 Through portraits of readers and their responses to texts Reading Practice reconstructs the contours of the knowledge economy that shaped medicine and science in early modern England Reading Practice tells the story of how ordinary people grew comfortable learning from commonplace manuscripts and printed books such as almanacs medical recipe collections and herbals From the turn of the fifteenth century to the close of the sixteenth century these were the books English people read when they wanted to attend to their health or understand their place in the universe Before then these works had largely been the purview of those who could read Latin Around 1400 however medical and scientific texts became available in Middle English while manuscripts became less expensive These vernacular manuscripts invited their readers into a very old and learned conversation Hippocrates and Galen weren t distant authorities whose word was law they were trusted guides whose advice could be excerpted rearranged recombined and even altered to suit a manuscript compiler s needs This conversation continued even after the printing press arrived in England in 1476 Printers mined manuscripts for medical and scientific texts that they

would publish throughout the sixteenth century though the pressures of a commercial printing market encouraged printers to package these old texts in new ways Without the weight of authority conditioning their reactions and responses to very old knowledge and with so many editions of practical books to choose from English readers grew into confident critics and purveyors of natural knowledge in their own right Melissa Reynolds reconstructs shifting attitudes toward medicine and science over two centuries of seismic change within English culture attending especially to the effects of the Reformation on attitudes toward nature and the human body Her study shows how readers learned to be discerning and selective consumers of knowledge gradually through everyday interactions with utilitarian books
