Histoire De La Botanique En France:

French Botany in the Enlightenment R.L. Williams, 2013-06-29 Royal Instructions for Scientific Exploration 15 The French Gardener Overseas 33 The Voyage of La Perouse Part 1 From Brest to Monterey Bay 51 Part 2 From Monterey Bay to Botany Bay 73 Adventures and Misadventures The Bizarre Story of the Dupetit Th9uars Brothers 93 The Voyage of Entrecasteaux Part 1 Genesis and Preparation 107 Part 2 From Brest to Tasmania 119 Part 3 New Caledonia to Ambon 139 Part 4 Esperance Bay 153 Part 5 Tasmania Revisited 161 Part 6 On to New Caledonia 177 Part 7 Its Woeful End 189 Internment 199 From Explorer to Closet Botanist 209 Epilogue 221 Bibliography 227 General Index 233 Plant Index 237 Introduction I INTRODUCTION the title of this book is meant to signal at the outset its confines both its T inclusions and what is beyond its scope This volume does not stand alone neither in splendid nor terrifying isolation but as the third volume in a trilogy meant to be a commentary on the botanophilia that captured the literate public in 18th century France the very time that botany was becoming established as a science independent from medicine and herbal ism Even though the components of that phenomenon have been examined individually by earlier scholars a synthesis of them founded upon a reliable command of the history of botany has been wanting

Encyclopedia of Early Modern Philosophy and the Sciences Dana Jalobeanu, Charles T. Wolfe, 2022-08-27 This Encyclopedia offers a fresh integrated and creative perspective on the formation and foundations of philosophy and science in European modernity Combining careful contextual reconstruction with arguments from traditional philosophy the book examines methodological dimensions breaks down traditional oppositions such as rationalism vs empiricism calls attention to gender issues to insiders and outsiders minor figures in philosophy and underground movements among many other topics In addition and in line with important recent transformations in the fields of history of science and early modern philosophy the volume recognizes the specificity and significance of early modern science and discusses important developments including issues of historiography such as historical epistemology the interplay between the material culture and modes of knowledge expert knowledge and craft knowledge This book stands at the crossroads of different disciplines and combines their approaches particularly the history of science the history of philosophy contemporary philosophy of science and intellectual and cultural history It brings together over 100 philosophers historians of science historians of mathematics and medicine offering a comprehensive view of early modern philosophy and the sciences It combines and discusses recent results from two very active fields early modern philosophy and the history of early modern science Editorial Board EDITORS IN CHIEF Dana Jalobeanu University of Bucharest Romania Charles T Wolfe Ghent University Belgium ASSOCIATE EDITORS Delphine Bellis University Nijmegen The Netherlands Zvi Biener University of Cincinnati OH USA Angus Gowland University College London UK Ruth Hagengruber University of Paderborn Germany Hiro Hirai Radboud University Nijmegen The Netherlands Martin Lenz University of Groningen The Netherlands Gideon Manning CalTech Pasadena CA USA Silvia Manzo University of La Plata Argentina Enrico Pasini University of Turin Italy

Cesare Pastorino TU Berlin Germany Lucian Petrescu Universit Libre de Bruxelles Belgium Justin E H Smith University de Paris Diderot France Marius Stan Boston College Chestnut Hill MA USA Koen Vermeir CNRS SPHERE Universit de Paris France Kirsten Walsh University of Calgary Alberta Canada The Order of Minims in Seventeenth-Century France P.J.S. Whitmore,2012-12-06 Thinking of the text from the Dies frae S Matthew XXV 40 It is also probable that this other Saint Francis partly out of admiration for his illustrious compatriot of Assisi and partly from a compelling urge to be superlative in all things chose the title in opposition to the Franciscans the Fratres Minori l who had previously adopted this style taken from Saint Matthew XXIII 8 The title Minim was confirmed in these words eosque Eremitos Ordinis Minimorum Fratrum Eremitarum F Francesci de Paula in posterum nuncupari taken from the Papal Bull Meritis religiosae vitae of 26 February 1493 The earliest reference to the Order in France is in a fragment preserved in the Bibliotheque de l Arsenal called La regle et vie de Frere Franfois pauvre et humble hermite de Paule laquelle donne a tous ses 2 freres voulant entrer et vivre en son ordre The dating of this manuscript should be accepted with considerable reserve it bears a clearly legible 1474 although it seems most unlikely that any reference to an Order occurred before the Bull of 1493 or that any Rule appeared in French before the Founder s visit to Louis XI in 1483 3 The fame of Francis and his reputation as a guerisseur had reached the French court where Louis XI was sick and dying the King summoned him to the chateau of Le Plessis Ies Tours but it required the intervention of the Pope to make the hermit undertake the journey The Development of Biological Systematics Peter F. Stevens,1994-12-01 A reevaluation of the history of biological systematics that discusses the formative years of the so called natural system of classification in the eighteenth and nineteenth centuries Shows how classifications came to be treated as conventions systematic practice was not linked to clearly articulated theory there was general confusion over the shape of nature botany elements of natural history and systematics were conflated and systematics took a position near the bottom of the hierarchy of sciences **The Life Sciences in Eighteenth-Century French Thought** ,1998-03 Available for the first time in English Roger s masterwork of intellectual history situates the life sciences within the larger context of French Enlightenment thought and the history of institutions *Andrea Cesalpino's ›De Plantis Libri XVI‹ (1583) and the Transformation of Medical Botany in the 16th Century* Quentin Hiernaux,Corentin Tresnie,2023-07-24 In 1583 the Italian botanist and physician Andrea Cesalpino 1524 1603 published De Plantis Libri XVI made of 16 books libri considered to be the first treatise where botany is treated independently from medicine In so doing he broke with a long tradition inherited in Western science from Antiquity and perpetuated during the Middle Age through the early Renaissance De Plantis lays the foundations of scientific systematics through a new focus on plant morphology and natural similarities and became a milestone in the history of Western botany It is a precious testimony to the evolution of botanical and physiological knowledge in the Middle Ages and the Renaissance and illustrates the role of Aristotelian philosophy in 16th century knowledge The volume includes an introductory essay about Cesalpino s philosophy and botany a critical edition of the Latin

text a translation a commentary and indexes It should interest scholars in Renaissance studies historians and philosophers of science and medicine as well as botanists and plant scientists curious about the history of plant sciences

Botanophilia in Eighteenth-Century France R.L. Williams,2013-03-09 The book describes the innovations that enabled botany in the Eighteenth century to emerge as an independent science independent from medicine and herbalism This encompassed the development of a reliable system for plant classification and the invention of a nomenclature that could be universally applied and understood The key that enabled Linnaeus to devise his classification system was the discovery of the sexuality of plants The book which is intended for the educated general reader proceeds to illustrate how many aspects of French life were permeated by this revolution in botany between about 1760 to 1815 a botanophilia sometimes inflated into botanomania The reader should emerge with a clearer understanding of what the Enlightenment actually was in contrast to some popular second hand ideas today

Bibliographies of Botany ,1909 **The Tentacles of Progress** Daniel R. Headrick,1988-03-10 This penetrating examination of a paradox of colonial rule shows how the massive transfers of technology including equipment techniques and experts from the European imperial powers to their colonies in Asia and Africa resulted not in industrialization but in underdevelopment Examining the most important technologies shipping and railways telegraphs and wireless urban water supply and sewage disposal economic botany and plantation agriculture irrigation and mining and metallurgy Headrick provides a new perspective on colonial economic history and reopens the debate on the roots of Asian and African underdevelopment

The Wild and the Sown Mauro Ambrosoli,1997-01-09 This book describes the spread of new agricultural practice in the half millennium after 1350 and reconstructs a neglected part of Europe s agricultural past the introduction of fodder crops and the continuous reorganisation of traditional botanical inputs within a new system of farming It breaks entirely new ground by showing the distant historical origins of a major transformation in land potential and farm productivity A vast range of evidence is cited from Italy France England and elsewhere to produce in effect an economic social and cultural history of Europe in which the focus is on the long distance consequences of the agricultural revolution

The Copepodologist's Cabinet David M. Damkaer,2002 Copepod crustaceans are the most numerous multicellular animals on earth They occur in every free living and parasitic aquatic niche Copepods have been known since the time of Aristotle yet there has never been a history of the study of copepods This volume the first in a planned three volume series reviews the discoveries of copepods to 1832 the year that the two distinct branches the free living copepods long known as insects and the parasitic copepods thought to be molluscs or worms were finally acknowledged as members of

the same Class Crustacea The narrative includes the biographies of 90 early copepodologists and recounts their most important contributions to science Portraits are included for two thirds of the subjects with considerable new material as well as information and illustrations from obscure sources Milestones include the first description of copepods ca 350 B C the first illustration 1554 the first free living freshwater copepod 1688 the first explanation of a free living copepod s metamorphosis 1756 the first permanently named copepod 1758 the first free living marine copepod 1770 and the first description of a parasitic copepod s metamorphosis 1819 The work ends with a transition to the mid 19th century previewing numerous personal connections that pointed toward copepodology s Golden Age in the 1890s to be covered in Volume 2 A final volume will take the history of the study of copepods to ca 1950 *Histoire de la botanique en France* Adrien Davy de Virville, 1954
