The Science of State Power in the Habsburg Monarchy, 1790-1880 Borbala Zsuzsanna Török, 2024-06-01 The formation of modern European states during the long 19th century was a complicated process challenged by the integration of widely different territories and populations The Science of State Power in the Habsburg Monarchy 1790 1880 builds on recent research to investigate the history of statistics as an overlooked part of the sciences of the state in Habsburg legal education as well as within the broader public sphere By exploring the practices and social spaces of statistics author Borb la Zsuzsanna T r k uncovers its central role in imagining the composite Habsburg Monarchy as a modern and unified administrative space

Creolised Science Dorit Brixius, 2024-04-04 This rich deeply researched study offers the first comprehensive exploration of cross cultural plant knowledge in eighteenth century

Mauritius Using the concept of creolisation the process by which elements of different cultures are brought together to create entangled and evolving new entities Brixius examines the production of knowledge on an island without long established traditions of botany as understood by Europeans Once foreign plants and knowledge arrived in Mauritius they were adapted to new environmental circumstances and a new socio cultural space Brixius explores how French colonists settlers mediators labourers and enslaved people experienced and shaped the island s botanical past centring the contributions of subaltern actors By foregrounding neglected non European actors from both Africa and Asia within a melting pot of cultivation traditions from around the world she presents a truly global history of botanical knowledge Positive Law from the Muslim World Baudouin Dupret,2021-06-24 Can the concept of law be indiscriminately extended to times and places in which it did simply not exist Such an extension is at best useless and at worst misleading Producing an intelligible jurisprudence of the concept of law means keeping it within the reasonable boundaries of its contemporary common sense understanding positive law Parallel to Western societies in which it firstly emerged the concept of positive law developed in many places including countries characterized as Muslim There it faced other existing normativities like customs and the Sharia This book aims from the Muslim world s perspective to clarify the uses of the concept of law and the ways of studying it to describe some of its historical developments including the ideas of constitutional law customary law and forensic evidence and to describe present day practices including reference to law sources rules and interpretation Religion, Modernity, Globalisation François Gauthier,2019-09-30 This book argues that the last four decades have seen profound and important changes in the nature and social location of religion and that those changes are best understood when cast against the associated rise of consumerism and neoliberalism These transformations are often misunderstood and underestimated namely because the study of religion remains dependent on the secularisation paradigm which can no longer provide a sufficiently fruitful framework for analysis The book challenges diagnoses of transience and fragmentation by proposing an alternative narrative and set of concepts for understanding the global religious landscape The present situation is framed as the result of a shift from a National Statist to a Global Market regime of religion Adopting a holistic perspective that breaks with the current specialisation tendencies it charts the emergence of the State and the Market as institutions and ideas related to social order as well as their changing rapports from classical modernity to today Breaking with a tradition of Western centeredness the book offers probing enquiries into Indonesia and a synthesis of global and Western trends This long awaited book offers a bold new vision for the social scientific study of religion and will be of great interest to all scholars of the Sociology and Anthropology of religion as well as Religious Studies in general The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license *The Routledge Companion to Historical Theory* Chiel van den Akker,2021-11-15 This Companion provides a wide ranging and up to date overview of the conceptual issues that history as a discipline and

mode of thought gives rise to The book offers both historical and systematic treatments of these issues as well as addressing their contemporary relevance Structured in three parts Modes and Schools of Historical Thought Epistemology and Metaphysics of History and Issues and Challenges in Historical Theory it offers the reader a wide scope and expert treatment of each topic in this vibrant field that can be read in any order An international team of experts both discuss the basis of their topic and present their own view offering the reader a cutting edge contribution while ensuring their chapters are of interest to both students and specialists in the field of historical theory and engaging with the very nature of historical thought the metaphysics of historical existence the politics of history writing and the intelligibility of the historical process The volume is an indispensable companion to the study of history and essential reading for anyone interested in the reflection on the nature of history and our historical existence **The Oxford Handbook of the History of Archaeology** Margarita

Díaz-Andreu, Laura Coltofean, 2024 The Oxford Handbook of the History of Archaeology offers comprehensive perspectives on the origins and developments of the discipline of archaeology and the direction of future advances in the field Written by thirty six archaeologists and historians from all over the world it covers a wide range of themes and debates including biographical accounts of key figures scientific techniques and archaeological fieldwork practices institutional contexts and the effects of religion nationalism and colonialism on the development of archaeology State Law and Legal Positivism

, 2021-12-13 This volume formulates the hypothesis of a truly global revolution that reflected a Great Divide between ancient and new legal regimes The volume brings together several case studies of transition from an ancient to a new legal regime characterized by the positivization of the law This was an effect of Western imperialism but also of local elites conviction that positive law was an efficient instrument of governance The contributors emphasize the depth and scale of the positivist legal revolution and explore the phenomenon whether it was the outcome of either direct colonialism Morocco Egypt India or indigenous reformism Ottoman empire China Japan The Interwar World Andrew Denning, Heidi J.S. Tworek, 2023-08-29

The Interwar World collects an international group of over 50 contributors to discuss analyze and interpret this crucial period in twentieth century history A comprehensive understanding of the interwar era has been limited by Euro American approaches and strict adherence to the temporal limits of the world wars The volume s contributors challenge the era s accepted temporal and geographic framings by privileging global processes and interactions Each contribution takes a global thematic approach integrating world regions into a shared narrative Three central questions frame the chapters First when was the interwar Viewed globally the years 1918 and 1939 are arbitrary limits and the volume explicitly engages with the artificiality of the temporal framework while closely examining the specific dynamics of the 1920s and 1930s Second where was the interwar Contributors use global history methodologies and training in varied world regions to decenter Euro American frameworks engaging directly with the usefulness of the interwar as both an era and an analytical category Third how global was the interwar Authors trace accelerating connections in areas such as public health and mass culture

counterbalanced by processes of economic protectionism exclusive nationalism and limits to migration By approaching the era thematically the volume disaggregates and interrogates the meaning of the global in this era As a comprehensive guide this volume offers overviews of key themes of the interwar period for undergraduates while offering up to date

historiographical insights for postgraduates and scholars interested in this pivotal period in global history **The Government of Natural Resources** Stéphane Castonguay, 2021-04-15 The Government of Natural Resources explores scientific and technical activity in Quebec from Confederation until the eve of the Second World War Scientific and technical personnel are an often quiet presence within the state but they play an integral role At the turn of the twentieth century the provincial government created geology forestry fishery and agronomy services These new services drew from recently established university technical programs to amass a corps of skilled employees to support their mission exploiting resources and occupying territory St phane Castonguay traces the history of mining logging hunting fishing and agriculture in Quebec to reveal how territorial and environmental transformations thus became a tool of government By helping to define and shape such interventions scientific activity contributed to state formation and expanded administrative capacity The lessons that this thoughtful reconceptualization of resource development offers reach well beyond provincial borders **Cultures**

without Culturalism Karine Chemla, Evelyn Fox Keller, 2017-03-23 Cultural accounts of scientific ideas and practices have increasingly come to be welcomed as a corrective to previous and still widely held theories of scientific knowledge and practices as universal The editors caution however against the temptation to overgeneralize the work of culture and to lapse into a kind of essentialism that flattens the range and variety of scientific work The book refers to this tendency as culturalism The contributors to the volume model a new path where historicized and cultural accounts of scientific practice retain their specificity and complexity without falling into the traps of culturalism They examine among other issues the potential of using notions of culture to study behavior in financial markets the ideology organization and practice of earthquake monitoring and prediction during China s Cultural Revolution the history of quadratic equations in China and how studying the glass ceiling and employment discrimination became accepted in the social sciences Demonstrating the need to understand the work of culture as a fluid and dynamic process that directly both shapes and is shaped by scientific practice Cultures without Culturalism makes an important intervention in science studies Contributors Bruno Belhoste Karine Chemla Caroline Ehrhardt Fa ti Fan Kenji Ito Evelyn Fox Keller Guillaume Lachenal Donald MacKenzie Mary S Morgan Nancy J Nersessian David Rabouin Hans J rg Rheinberger Claude Rosental Koen Vermeir **Methodological**

Challenges in Nature-Culture and Environmental History Research Jocelyn Thorpe, Stephanie Rutherford, L. Anders Sandberg, 2016-11-10 This book examines the challenges and possibilities of conducting cultural environmental history research today Disciplinary commitments certainly influence the questions scholars ask and the ways they seek out answers but some methodological challenges go beyond the boundaries of any one discipline The book examines how to account for

the fact that humans are not the only actors in history yet dominate archival records how to attend to the non visual senses when traditional sources offer only a two dimensional non sensory version of the past how to decolonize research in and beyond the archives and how effectively to use sources and means of communication made available in the digital age This book will be a valuable resource for those interested in environmental history and politics sustainable development and historical geography

Knowledge and the Early Modern City Bert De Munck, Antonella Romano, 2019-08-20 Knowledge and the Early Modern City uses case studies from the sixteenth to the eighteenth centuries to examine the relationships between knowledge and the city and how these changed in a period when the nature and conception of both was drastically transformed Both knowledge formation and the European city were increasingly caught up in broader institutional structures and regional and global networks of trade and exchange during the early modern period Moreover new ideas about the relationship between nature and the transcendent as well as technological transformations impacted upon both considerably This book addresses the entanglement between knowledge production and the early modern urban environment while incorporating approaches to the city and knowledge in which both are seen as emerging from hybrid networks in which human and non human elements continually interact and acquire meaning It highlights how new forms of knowledge and new conceptions of the urban co emerged in highly contingent practices shedding a new light on present day ideas about the impact of cities on knowledge production and innovation Providing the ideal starting point for those seeking to understand the role of urban institutions actors and spaces in the production of knowledge and the development of the so called modern knowledge society this is the perfect resource for students and scholars of early modern history and knowledge

Interdisciplinarity and Archaeology Laura Coltofean-Arizancu, Margarita Díaz-Andreu, 2021-03-15 This book explores the history of interdisciplinary relationships between archaeology and other branches of knowledge in Europe and elsewhere This is a largely untold history that needs to be unpacked This book brings to light some of the events leading towards interdisciplinary relations in archaeology from the nineteenth to the twentieth century It encompasses ten scholarly contributions that offer a critical overview of this complex dynamic and long lasting transformative process This is a pioneering project in the field of the history of archaeology as it is the first to examine the inclusion into archaeological practice of various disciplines categorized under the umbrella of hard natural and social sciences as well as the humanities The authors of this volume include internationally acknowledged scholars of the history of archaeology such as Margarita Díaz-Andreu Nathan Schlanger and Oscar Moro as well as other well established authors in the field from Italy Portugal Romania Spain and Switzerland The chapters cover a wide range of topics Several of them deal with interdisciplinarity in archaeology on a more general level by analysing its relationship with other sciences in specific countries Other chapters discuss the incorporation of disciplines such as palynology and zoology into archaeology either on a wider scale or using certain countries as case studies Some authors focus on the work of scholars as starting points for examining the intersection

between antiquarianism archaeology the natural sciences and numismatics while others theorize on the influence of epistemology and philosophy of science on archaeological theory and practice Finally the influence of the army is also discussed in the development of archaeology

L'empire des chiffres Olivier Martin, 2020-09-16 Nos sociétés contemporaines sont remplies de toutes sortes de chiffres mesures de tout ordre valuations statistiques indices estimations etc L'originalité de ce livre est de proposer pour la première fois une analyse globale de tous ces types de chiffres de toutes les formations de quantification qui peuvent être appréhendées et comprises à l'aide d'une gamme d'outils unique Il synthétise les travaux sur la quantification de deux traditions distinctes ceux d'histoire sociale et culturelle sur les mesures de la nature le temps l'espace les objets la vie le monde physique visible et invisible et ceux de la sociologie historique sur les statistiques et les indicateurs sociaux Qu'y a-t-il de commun tous ces chiffres D'où viennent-ils quoi servent-ils et quels sont leurs effets Les discours sur les chiffres oscillent très souvent entre deux positions radicales les chiffres sont des mesures de la réalité versus les chiffres ne sont que des mensonges L'ouvrage permet de dépasser cette opposition réductrice en proposant un cadre général pour penser les chiffres

Endless Immunity Marc Daëron, 2025-07-18 This book takes the reader on an inspiring journey into the immune system challenging long held beliefs about immunity It examines the immune system under historical philosophical and biological perspectives It proposes a new way of understanding immunity that goes beyond the binary opposition between self and non self Indeed we the living are chimeras Mammals birds reptiles or fish insects spiders or mollusks plants or algae we are all made up of a community of living beings who share their lives in the same meta organism If we live together it is because we need each other to live and if we can live together it is because an immune system makes it possible by adapting us to them and by adapting them to us From this mutual adaptation a new kind of immunity emerges dynamic relational never acquired an endless immunity Immunity that this system makes possible is not perfect far from it it is a compromise which does not always prevent disease sometimes it even causes it Disease is the cost of immunity Because what the immune system enables is much more essential than the defense of the organism it is the very existence of the meta organism that we are Immunity is more than a protection it is a condition of existence With its didactic structure and accessible style this book is an essential resource for anyone interested in understanding immunity and the immune system It offers different levels of complexity from which the reader can choose depending on his or her background without compromising the main message of the text With a Foreword by Alfred I Tauber

Transfixed by Prehistory Maria Stavrini, 2022-05-24 An examination of how modern art was impacted by the concept of prehistory and the prehistoric Prehistory is an invention of the late nineteenth century In that moment of technological progress and acceleration of production and circulation three major Western narratives about time took shape One after another these new fields of inquiry delved into the obscure immensity of the past first to surmise the age of the Earth second to find the point of emergence of human beings and third to ponder the age of art Maria Stavrini considers the inseparability of these

accounts of temporality from the disruptive forces of modernity She asks what a history of modernity and its art would look like if considered through these three interwoven inventions of the longue durée Transfixed by Prehistory attempts to articulate such a history which turns out to be more complex than an inevitable march of progress leading up to the Anthropocene Rather it is a history of stupor defamiliarization regressive acceleration and incessant invention since the new was also found in the deep sediments of the Earth Composed of as much speed as slowness as much change as deep time as much confidence as skepticism and doubt modernity is a complex phenomenon that needs to be rethought Stavrinaki focuses on this intrinsic tension through major artistic practices Cézanne Matisse De Chirico Ernst Picasso Dubuffet Smithson Morris and contemporary artists such as Pierre Huyghe and Thomas Hirschhorn philosophical discourses Bataille Blumenberg and Jäger and the human sciences This groundbreaking book will attract readers interested in the intersections of art history anthropology psychoanalysis mythology geology and archaeology *Les nouveaux visages du monde* Jean-Jacques Bavoux, 2024-10-09 La géographie des Temps modernes fournit durant quatre siècles des visions du monde extrêmement contrastées utopies légendes chimères prodiges et hypothèses se mêlent une scientificité qui s'affine mesure précise du méridien pesanteur et déclinaison magnétique quantification introduction des statistiques recherche de principes universels Les chocs culturels sont considérables On continue chercher avec le plus grand sérieux où sont localisés le Paradis le sixième continent antipodal l'Eldorado ou les îles Fortunées mais en même temps on quadrille méthodiquement la planète on la contrôle systématiquement par le filet serré des latitudes et des longitudes on la démystifie coups de cartes savantes et de statistiques austères De même tandis que certains assimilent encore la Terre un être vivant capricieux ou la voient comme le centre unique et glorieux du cosmos d'autres montrent qu'elle n'est qu'un minuscule et banal grain de sable dans l'univers d'un sormais infini de la pluralité des mondes De l'imaginaire dans les représentations géographiques aux assimilations de la nouvelle immensité en passant par la conscience de la finitude du monde les géographes dessinent peu à peu les nouveaux systèmes de compréhension du monde *Histoire des sciences et des savoirs*, 2015-10-15 Les trois tomes s'enchaînent selon une logique chronologique 1 De la Renaissance aux Lumières 2 Modernité et globalisation 1770-1914 3 Le siècle des technosciences depuis 1914 mais sont structurés selon une même organisation thématique Ils débattent dans un premier temps ce qu'est la science chaque époque et comment elle s'inscrit dans la société et la culture de la période puis offrent un panorama approfondi de l'évolution des principaux champs et disciplines phares et enfin replacent les évolutions scientifiques dans l'histoire globale et dans les enjeux de gouvernement de la nature des corps des savoirs de la société du progrès de ses risques etc Se donnant comme la Modernité les années 1770-1914 sont le temps de l'industrialisation et de l'expansion impériale et coloniale La science est victorieuse la technique est reine la Terre est quadrillée et mesurée les populations sont mises en nombres les races sont cartographiées Laboratoires universités et musées se répandent l'écrit planétaire Réunissant les contributions de spécialistes des quatre coins du monde ce deuxième tome de l'Histoire des sciences et des savoirs nous parle des sciences physiques et
