Images of Torah: From the Second-Temple Period to the Middle Ages Jeong Mun. Heo, 2023-06-26 This book explores the way that the Torah was appreciated and interpreted as a text and symbol in Christian and Jewish sources from the Second Temple period through the Middle Ages It tracks the development and complex interactions of three images of Torah God like Angelic and Messianic which are found in late antique Jewish and Christian materials as well as in medieval kabbalistic and Jewish philosophic sources It provides a unique template for tracing the development of theological ideas related to the images of Torah and offers a sophisticated and innovative analysis of the relationship between mystical experience theology and phenomenology

Time, Religion and History William Gallois, 2014-06-11 What is time How does our sense of time lead us to approach the world How did the peoples of the past view time This book answers these questions through an investigation of the cultures of time in Christianity Islam Buddhism Judaism and the Australian Dreamtime It argues that our contemporary world is blind as to the significance and complexity of time preferring to believe that time is natural and unchanging This is of critical importance to historians since the base matter of their study is time yet there is almost no theoretical literature on time in history This book offers the first detailed historiographical study of the centrality of time to human cultures It sets out the complex ways in which ideas of time developed in the major world religions and the manner in which such conceptions led people both to live in ways very different to our contemporary world and to make very different kinds of histories It goes on to argue that modern scientific descriptions of time such as Einsteins Theory of Relativity lie much closer to the complex understandings of time in religions such as Christianity than they do to our common sense notions of time which are centred on progress through a past present and future

tales myths legal proceedings and religious art Aron Beller finds that narratives alleging that Jews committed violence against images of Christ Mary and the disciples flourished in Europe between the fifth and seventeenth centuries She then explores how these narratives manifested differently across the continent and the centuries finding that their potency reflected not Jewish actions per se but Christians own concerns about slipping into idolatry when viewing depictions of religious figures In addition Aron Beller considers Jews own attitudes toward Christian imagery and the ways in which they responded to and rejected or embraced such allegations By examining how desecration allegations affected Jewish individuals and communities spanning Byzantium medieval England France Germany and early modern Spain and Italy Aron Beller demonstrates that this charge was a powerful expression of the Christian majority s anxiety around committing idolatry and their eagerness to participate in practices of veneration that revolved around visual images an anxiety that evolved through the centuries and persists to this day

Images of Childhood C. Philip Hwang, Michael E. Lamb, Irving E. Sigel, 2014-02-04 The twentieth century will surely be remembered as a period of remarkable calamity vigorous intellectual activity and striking technological progress For the first time in history the development of rapid forms of communication and transportation shrunk the effective size of the world so that many of its citizens were made aware of events occurring in far distant locations and came to appreciate cultural differences more directly than was previously possible Among the many trends and events for which the century may be remembered however one will surely be the ascendancy of science and scientific thinking Given adequate resources and ample time scientists have argued they will be able to reduce the mysteries of the universe as well as the mysteries of life and death to objectifiable processes and events The editors of this book draw attention to the implicit and explicit images of childhood that various disciplines especially development psychology have constructed These sometimes unspoken metaphors have enduring value in that they provide a means of drawing together integrating and interpreting otherwise disparate findings or conclusions They also provide a ready means of conveying the fruits of scientific research to the people who constitute its primary consumers The contributors strive to show that the images of childhood that each professional implicitly carries in her or his head vary across historical epochs just as they vary across cultures and subcultures Perhaps even more alarmingly some of these images seem to reflect the politically correct ideology of particular times and places at least as much as they represent the objective findings they purport to summarize This volume s main objective is to unpackage cultural and historical variations in the conception of childhood in order to make clearer those which might be considered universal aspects of behavioral and psychological development and those which must be seen as temporary cultural constructions or images The specific aims of this volume are to delineate images of childhood in diverse cultural subcultural and historical contexts illustrate how these images of childhood are manifested in popular proverbs as well as in distinct patterns of childrearing

broadly conceived to include aspects of parental behavior childcare arrangements education indoctrination and the assignment of responsibilities indicate how these images of childhood are manifest in the development and implementation of educational and social policies as well as in the legal status of children consider whether children are believed to have a privileged place in society and whether age graded constraints limit their roles and participation in society and evaluate the extent to which cultural images affect the ways in which developmental processes are viewed or understood *France*
