Understanding Historical Concepts

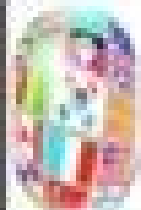

1 - Government

The reasons why humans created governments and what roles they commonly performed.

5 - Economics

How societies and individuals have attempted to manage and use their resources.

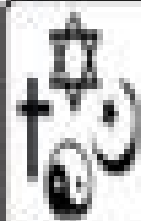

2 - Nations & Nationality

What factors turn small communities into nations and how nations expand.

6 - Geography

How geographical factors have impacted human life and evolution.

3 - Religion

Why humans developed spiritual beliefs and how these influenced their governments and societies.

7 - Historical Sources

How documents from the past can help us to understand events from different perspectives.

4 - Societies

How large groups of humans have organized themselves into smaller divisions and classes.

8 - Cause and Effect

Learning how events can have multiple causes and how to analyze their importance.

In my many years of teaching history I've often found that the biggest problem students have is that they have little or no knowledge about basic concepts as simple as what governments do, what economics is, and how societies are organized among other things.

This unit is designed to give students a basic schema into which they can place and arrange the information and ideas they learn throughout their study of ancient and world history.

Students will also be introduced to how to use and evaluate historical sources as well as employ basic graphic organizers to help arrange and analyze information.

History of Concepts Iain Hampsher-Monk, Karin Tilmans, Frank van Vree, 1998 Although vastly influential in German speaking Europe conceptual history Begriffsgeschichte has until now received little attention in English This genre of intellectual history differs from both the French history of mentalit s and the Anglophone history of discourses by positing the concept the key occupier of significant syntactical space as the object of historical investigation Contributions by distinguished practitioners and critics of conceptual history from Europe and America illustrate both the distinctiveness and diversity of the genre The first part of the book is devoted to the origins and identity of the field as well as methodological issues Part two presents exemplary studies focusing either on a particular concept such as Maurizio Viroli s Reason of the State or a particular approach to conceptual history e g Bernard Scholz for literary criticism and Terence Ball for political science The final most innovative section of the book looks at concepts and art high bourgeois and demotic Here Bram Kempers discusses the conceptual history of Raphael s frescos in the Stanza della Segnatura of the Vatican Eddy de Jongh examines the linguistic character of much Dutch genre painting and Rolf Reichardt considers the conceptual structure implicit in card games of the French Revolution used to induct those on the margins of literacy into the new revolutionary world view

The Practice of Conceptual History Reinhart Koselleck, Todd Samuel Presner, 2002 Reinhart Koselleck is one of the most important theorists of history and historiography of the last half century He is the foremost exponent and practitioner of Begriffsgeschichte a methodology of historical studies exemplified in these 18 essays which focus on the invention and development of the fundamental concepts underlying and informing a distinctively historical manner of being in the world

situated in its time in an ever shifting and open ended horizon of possibilities to which it must respond by disclosing alternative ways of thinking and acting His innovative and original argument will serve to move the debate over the future of critical studies forward beyond simple antinomies to a consideration of as he puts it what critical theory should be if it is to have a future worthy of its past
