[The Roman Republic, History, Myths,](#)

Politics, and Novelistic Historiography Miguel A. Faria, Jr.,2025-06-09 The history of the Roman Republic has been shrouded in myth assailed by gaps in historical knowledge and even immersed in political biases But in this book the author has succeeded in penetrating the mist using both ancient and modern sources as well as numismatic information and other illustrative materials and artforms He narrates the history of ancient Rome from its beginnings with the legendary seven kings of Rome the founding and struggles of the Republic the wars of conquests and civil wars to the collapse of the Republic and the inception of the Roman Empire with Augustus Peace is finally established and the Augustan Renaissance and the Pax Romana followed hinting at the course of Western civilization One lesson is learned Liberty and civic duties are too valuable to be forsaken for the material safety of bread and circuses because in the end citizens so partaking may end up with neither liberty nor safety

**A Brief Natural History of Civilization** Mark Bertness,2020-04-14 A compelling evolutionary narrative that reveals how human civilization follows the same ecological rules that shape all life on Earth Offering a bold new understanding of who we are where we came from and where we are going noted ecologist Mark Bertness argues that human beings and their civilization are the products of the same self organization evolutionary adaptation and natural selection processes that have created all other life on Earth Bertness follows the evolutionary process from the primordial soup of two billion years ago through today exploring the ways opposing forces of competition and cooperation have led to current assemblages of people animals and plants Bertness s thoughtful examination of human

history from the perspective of natural history provides new insights about why and how civilization developed as it has and explores how humans as a species might have to consciously overrule our evolutionary drivers to survive future challenges

**Visions of the Apocalypse** John Peter Allemand, 2015-10-16 The great Anglo American empire the mightiest military empire in world history is destined to come to an apocalyptic and inglorious end within the lifetimes of most readers of this book This is the dire and dreadful message of Visions of the Apocalypse I had offered these same Bible based predictions ten years ago in a work published under a poetic title being fully aware at the time that books by unknown poets are usually ignored My presumption proved correct and the book caused hardly a stir By choosing that approach I meant to fulfill my mandate and calling in a manner that would avoid undue publicity and possible controversy Recent world events have strengthened my belief in the validity of my earlier message and with the end time approaching with alarming speed I have now decided that I must sound the alarm once more by publishing this revision but under a title reflecting its true content

**Beyond Earth** Bob Krone, 2006 This is a critical time for the space program and for all of us Even the significant steps that we have taken since the dawn of the space age in 1957 including orbital flight the Moon landings and orbiting space stations will in retrospect seem to be tiny steps compared to what lies ahead Migrating into space will challenge us beyond anything we have previously accomplished and we are destined to face adventures that are both fantastically breathtaking and supremely dangerous Beyond Earth is for everyone interested in humankind's next great adventure the human settlement of the Solar System A unique collection of world class scholars scientists engineers managers astronauts artists authors and professors examine the key questions of our unique circumstance at the dawn of a new era in space exploration and development Why does space matter to us What can we use it for How can we get there efficiently What will ordinary life be like in space What will our homes be like on the Moon On Mars In orbit Will we play Will we love The book does not stop with questions It goes beyond the dramatic the superficial and the overly technical to the prescriptive literally laying the brick and mortar for our future space faring civilisation Contributing authors come from both hard and soft sciences include education and the arts and ask children who will be the future space dwellers for their visions They document needed research There are three underlying assumptions driving this book First that the human urge for flight exploration and survival plus its curiosity about the universe are deeply embedded in our genes and in our minds Second that even if these urges were ignored the continual improvement of the quality of life for the human race on earth and perhaps even its ultimate survival hinge on the successes of human exploration and habitation of space and Third that our generation can use the opportunity presented by outwards expansion to design a rewarding and exciting future of collaboration to capitalise on the lessons learned from human history on Earth *The Hosmer Heritage*, 1987 *The Costume Technician's Handbook* Rosemary Ingham, 1992 **Ice Age Hidden History** Learn Alchemical, 2025-08-28 What if the story of civilization did not begin in Mesopotamia Egypt or the Indus Valley but thousands of years earlier in the shadows of the Ice Age Ice Age Hidden

History challenges the conventional timeline and explores the possibility that advanced human cultures once thrived long before recorded history only to be erased by floods climate upheaval and the rising seas of a world in transition From the megalithic enclosures of G bekli Tepe to the enigmatic Yonaguni Monument beneath the Pacific from the drowned plains of Doggerland to the colossal stones of Baalbek this book journeys across the globe to investigate anomalies that defy orthodox explanations Were these structures the work of scattered hunter gatherers or do they hint at a deeper legacy a mother culture whose knowledge and memory survive only in myths of flood fire and forgotten gods Drawing on archaeology geology genetics and comparative mythology Ice Age Hidden History reveals how fragile our vision of the past truly is and how much remains buried beneath the earth and sea Far from idle speculation this is a serious inquiry into the gaps controversies and overlooked evidence that challenge the story we ve been told Readers are invited to look again at the ruins the myths and the science and to consider the unsettling possibility that civilization is not a one way climb but a cycle of rise destruction and rebirth Ice Age Hidden History is for seekers of the ancient mysteries lovers of archaeology and anyone willing to entertain the notion that the human story is far older stranger and richer than we dare imagine

Poems for the End of the Age John Peter Allemand, 2016-10-12 Poems for the End of the Age is a poetry book with an apocalyptic message A reading of the Book of Revelation the last book of the Bible and also known as the Revelation to John or the Apocalypse has led the author to an entirely new and astounding interpretation of a number of Johns visions His conclusion is that there will be an end time upheaval in the world order and specifically a catastrophic war between the United States and Russia before the end of 2030 An Introduction offers the historical background and the detailed analysis of the Apocalypse for this frightening scenario The following seventy rhymed quatrains are divided into two collections namely Reflections of a Believer and Empire of the Apocalypse The former includes verses of a Christian inspirational and personal nature while the latter directly addresses the authors interpretation of the Apocalypse In a poem of 100 rhymed quatrains entitled Discourse on the Mosel or The Century Poem four characters namely an American a German an Israeli and a Poet discuss their views of recent historical events and their prognostications for the future

**Ancient Civilizations of the World** Denny Rose & Rowan Allen, 2018-05-08 About 5 000 years ago the first urban societies developed laying the foundations for the first civilizations Nearly all civilizations share the same few features they have abundant food surpluses contained cities political bureaucracies armies defined religious and social hierarchies and long distance trading Ancient Egyptian culture flourished between c 5500 BCE with the rise of technology as evidenced in the glass work of faience and 30 BCE with the death of Cleopatra VII the last Ptolemaic ruler of Egypt It is famous today for the great monuments which celebrated the triumphs of the rulers and honored the gods of the land The culture is often misunderstood as having been obsessed with death but had this been so it is unlikely it would have made the significant impression it did on other ancient cultures such as Greece and Rome Neolithic means e new stonee even though agriculture was the crowning achievement of the period Civilizations started out small Agriculture at first

tended to tie only small groups together These groups also all settled along rivers important as a reliable and predictable source of water As time passed families usually worked the same plot of land over successive generations leading to the concept of ownership Ancient mortars and grinding tools unearthed in a large mound in the Zagros Mountains of Iran reveal that people were grinding wheat and barley about 11 000 years ago Grass pea wild wheat wild barley and lentils were found throughout the site including some of the earliest known samples This was much further east than most sites known for early agriculture This book furnishes with utmost facility to all classes of readers the needed information on ancient civilization The unusual variety of the subject makes this a work of endless fascination **The History of the World** Alex
