Exercise: Concepts and Report

Write, draw, discuss with partner, prepare for presentation!

The cell specialization with position and other local features has given homocystalline and polycrystalline cells with different properties. Especially, we refer to the different properties with regard to a local order accompanying features.

a) Materials and their Issues

- What are Polymers used?
- How are polymers of a structure and a properties?
- What are different chemical homopolymers and heteropolymers?

b) Materials Properties

- Consider the structure of a material with the atomic size of the polymer molecules in different homopolymers and heteropolymers. It is not negligible.
- Consider the following matrix system:

	in	in
in		
in		

- Using Polymers and their properties, explain the different cells homopolymers?
- Explain the structure of a material and the properties of the different polymers (the homopolymers, heteropolymers, and the homopolymers (polymers)).
