Infectious Madness Harriet A. Washington, 2016-10-04 Fascinating A superb book Robert Sapolsky Stanford professor of neuroscience and neurosurgery and author of *Why Zebras Don't Get Ulcers* What causes mental illness We've long blamed stress trauma and brain chemistry imbalances But a new theory is quietly achieving critical mass In *INFECTIOUS MADNESS* award winning science writer Harriet Washington reveals that schizophrenia obsessive compulsive disorder Alzheimer's and anorexia also may be caused by bacteria parasites or viruses Weaving together cutting edge research and case studies *INFECTIOUS MADNESS* shows how strep throat can trigger rapid onset OCD in a formerly healthy teen and how contact with cat litter elevates the risk of schizophrenia Featuring a new afterword by the author and rich in science medical mysteries cultural nuance and evidence based recommendations *INFECTIOUS MADNESS* pulls back the curtain on a new paradigm with profound implications for us all

A Terrible Thing to Waste Harriet A. Washington, 2019-07-23 A powerful and indispensable look at the devastating consequences of environmental racism Gerald Markowitz and what we can do to remedy its toxic effects on marginalized communities Did you know Middle class African American households with incomes between 50 000 and 60 000 live in neighborhoods that are more polluted than those of very poor white households with incomes below 10 000 When swallowed a lead paint chip no larger than a fingernail can send a toddler into a coma one tenth of that amount will lower his IQ Nearly two of every five African American homes in Baltimore are plagued by lead based paint Almost all of the 37 500 Baltimore children who suffered lead poisoning between 2003 and 2015 were African American From injuries caused by lead poisoning to the devastating effects of atmospheric pollution infectious disease and industrial waste Americans of color are harmed by environmental hazards in staggeringly disproportionate numbers This systemic onslaught of toxic exposure and institutional negligence causes irreparable physical harm to millions of people across the country cutting lives tragically short and needlessly burdening our health care system But these deadly environments create another insidious and often overlooked consequence robbing communities of color and America as a whole of intellectual power The 1994 publication of *The Bell Curve* and its controversial thesis catapulted the topic of genetic racial differences in IQ to the forefront of a renewed and heated debate Now in *A Terrible Thing to Waste* award winning science writer Harriet A Washington adds her incisive analysis to the fray arguing that IQ is a biased and flawed metric but that it is useful for tracking cognitive damage She takes apart the spurious notion of intelligence as an inherited trait using copious data that instead point to a different cause of the reported African American white IQ gap environmental racism a confluence of racism and other institutional factors that relegate marginalized communities to living and working near sites of toxic waste pollution and insufficient sanitation services She investigates heavy metals neurotoxins deficient prenatal care bad nutrition and even pathogens as chief agents influencing intelligence to explain why communities of color are disproportionately affected and what can be done to remedy this devastating problem Featuring extensive scientific research

and Washington's sharp lively reporting *A Terrible Thing to Waste* is sure to outrage transform the conversation and inspire debate

All In Her Head Misty Pratt, 2024-05-07 This provocative deeply personal book explores how women experience mental health care differently than men and lays out how the system must change for women to flourish Why are so many women feeling anxious stressed out and depressed and why are they not getting the help they need Over the past decade mood disorders have skyrocketed among women who are twice as likely to be diagnosed as men Yet in a healthcare system steeped in gender bias women's complaints are often dismissed their normal emotions are pathologized and treatments routinely fail to address the root causes of their distress Women living at the crossroads of racial economic and other identities face additional barriers How can we pinpoint what's wrong with women's mental health and what needs to change In *All in Her Head* science writer Misty Pratt embarks on a crucial investigation painting a picture of a system that is failing women on multiple levels Pratt who shares her own history of mental illness explores the stereotypes that have shaped how we understand and treat women's distress from the Ancient Greek concept of hysteria to today's self help solutions Weaving together science and women's personal stories *All in Her Head* debunks mental health myths and challenges misconceptions addressing the following questions When did normal emotions become symptoms of a disorder What are specific risk factors for common mental disorders that disproportionately affect women How did burnout become a women's disease What can we do to make peace with our moods and embrace the gifts of our emotions Pratt also tackles the thorny topic of medication taking a nuanced and evidence based approach Women who present at their doctor's office with depression anxiety or stress are often prescribed antidepressants as a first line treatment at least one in four American women are now taking these medications Antidepressants have a real effect that can be helpful for some individuals however Pratt persuasively argues that our current approach ignores the underlying causes of most women's depressive symptoms Today a rising movement of women is demanding better when it comes to mental health treatment Armed with the latest science insight from those who have been through the therapeutic system and enough humor to lighten the load *All in Her Head* provides women with hope and courage to reframe and reclaim their mental health

The American Medical Association on the Case for Teaching Racism Francis Kwarteng, 2021-04-26 The public lynching of George Floyd re-exposed the rotten underbelly of America and this together with the disproportionate impact of COVID 19 on Black and Brown communities the global Black Lives Matter protests and the racist xenophobic demagoguery of Donald Trump resurrected the old debates about medical racism race relations implicit bias vaccine nationalism vaccine imperialism structural inequality police brutality vaccine hesitancy unethical human experimentation vaccine diplomacy qualified immunity conspiracy theories and social justice Then in 2020 the American Medical Association formally declared racism a public health crisis defined racism as a social determinant of health and embraced the idea of medical schools teaching medical students about racism Alas the nursing curriculum is somewhat silent on these questions Decolonizing the nursing curriculum long overdue is therefore imperative This book

explores the question of decolonizing the nursing curriculum from the angles of postcolonial theory critiquing the Western literary canon American history literary criticism African literature cultural criticism Afrocentric theory democracy African American literature and critical race theory *Sanatana Dharma and Plantation Hinduism (Second Edition Volume 1)*

Throughout history we have been intrigued and baffled by mental illness Our confusion is nowhere more apparent than in the ways we have dealt with the mentally ill We have tortured exiled and burned them at the stake Yet at other times we have supported cared for and nurtured them It is apparent that society has never quite known how to respond to the insane whether to punish them for their acts or to pity them for their sickness In an original look at the nature of mental illness and the distinction between sanity and insanity Morris Rosenberg rejects most psychiatric psychological and sociological theories Instead he defines insanity as role taking failure the inability to grasp the thoughts and emotions of other human beings According to Rosenberg we characterize a person's ideas and behaviors as insane when we are unable to put ourselves in his place or to see the world through his eyes If we can comprehend the reasons for a person's speech or action we think of it as sane if not we consider it insane He contends that it is society's confusion about the mentally ill its inability to penetrate the unread mind that actually defines mental illness His radical thesis that mental illness is characterized by society's response not the individual's action gives us a new way to look at a subject that has puzzled society for centuries **Media Madness**, 1997 Madness: A Very Short Introduction Andrew Scull, 2011-08-25 Andrew Scull examines the social historical and culturally variable response to madness over the centuries providing a provocative and entertaining examination of mental illness over more than two millennia Front cover flap

Infectious Madness The Surprising Science Of How We Catch Mental Illness: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels enthralling the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the engaging narratives that have enthralled audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Infectious Madness The Surprising Science Of How We Catch Mental Illness : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and suspenseful novel that will keep you guessing until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
