Gestão da Segurança da Informação em Sistemas-de-Sistemas com Owlready2 Roberto Monteiro Dias, 2025-01-21 As intensas transformações ocorridas na sociedade nesta década tornaram os sistemas de informação mais complexos. Tal complexidade se relaciona a uma categoria de sistemas definida como sistemas de sistemas SoS. Embora o SoS ofereça benefícios e organize a dificuldade dos gestores de Tecnologia da Informação, o TI em lidar com a segurança da informação nesses sistemas pode deixar vulneráveis as ameaças e impactos causados por ataques cibernéticos. As ontologias podem ser utilizadas como solução para esse problema porque elas definem estruturas de conhecimento e promovem um entendimento compartilhado de um domínio tarefa ou aplicação. Nesse sentido, uma ontologia de domínio foi desenvolvida por meio da biblioteca owlready2 do Python para garantir a gestão do conhecimento em segurança em SoS e o seu entendimento compartilhado de modo que os stakeholders, gestores de TI e suas equipes possam evitar os riscos, as vulnerabilidades e as ameaças em SoS. Cabe também destacar a praticidade para a extração das informações da ontologia para utilização em aplicativos de celular, sites, smartwatches, smartphones e eletrodomésticos da linha smart, assistentes virtuais como Alexa, Amazon, Siri, Apple, Cortana, Microsoft, ChatGPT, entre outros. Tal utilidade simula queries de Sistemas de Gerenciamento de Banco de Dados para o uso de pequenas e médias empresas. Neste livro, abordado o tema gestão da segurança da informação em SoS por meio de uma ontologia de domínio com foco na sua aplicabilidade para indústria.

Organisations and Humanisation Myrte van de Klundert, Robert van Boeschoten, 2016-06-23 The term humanisation was introduced in humanistic studies to develop a humanist way of thinking about organisations and human relations. It stems from a need to think about questions of justice and living a good life in practice but not from some absolute or abstract point of view. As it is often framed, humanisation is concerned with working towards a more human type of organisation. Organisation studies are concerned with understanding organisations and their role in our society and developing perspectives and methods to improve them while humanisation theories on the other hand do not represent a managerial blueprint as they tend to incorporate notions of situated knowledge, sense making and relational value, drawing our attention to specific processes rather than offering universal truths. Although Critical Management Studies counters mainstream managerialism, it still tends to produce the same kind of truths that are supposed to apply to all organisations. Much of the existing management literature is related to control and offers strategies on how to do things but this is not about prescriptions rather how to explore possibilities from both theoretical and practical perspectives. It offers managers as well as theoreticians of organisations the possibility to question their grounding principles. In the variety of contributions to this book, the authors reflect on their understanding of what it is to be human and whether this can be found in the way that organisations are run. They consider the value of humanisation to understand and intervene in organisations and the challenges they face.
