**Bridging the Socio-technical Gap in Decision Support Systems** Ana Respício, 2010 The socio technical gap is the great divide between social activities such as coordination which researchers and practitioners aim to support and those that are actually supported by technology As the social interaction takes place through technology it is changed and mediated by the technology This gap between the two dimensions is being challenged by new and innovative approaches such as cognitive ergonomics and Web 2 0 3 0 Research in Decision Making DM theory and Decision Support Systems DSS shows that this gap

is due in part to technical limitations and in part to the complexity of the contexts where decision support must be provided. Thus DSS researchers face important questions concerned with the encapsulation of complex social aspects of managerial decision making as well as with the representation of key human cognitive mechanisms such as intuition and insight within computational systems. This book presents the latest innovations and advances in decision support theory and practice with a special focus on bridging the socio technical gap. These achievements will be of interest to all those involved in decision making activities and research. The book covers a wide range of topics including Understanding DM Design of DSS Web 2.0 Systems in Decision Support Business Intelligence and Data Warehousing Applications of Multi Criteria Decision Analysis Intelligent DM Context in DM Knowledge Management ERP Systems Decision Support for Policy Making Decision Making in Emergency Scenarios Decision Support in Commerce and Decision Support for Production Planning Encyclopedia of Police Science Jack Raymond Greene, 2006-10-23 In 1996 Garland published the second edition of the Encyclopedia of Police Science edited by the late William G Bailey. The work covered all the major sectors of policing in the US. Since then much research has been done on policing issues and there have been significant changes in techniques and in the American police system. Technological advances have refined and generated methods of investigation. Political events such as the terrorist attacks of September 11, 2001 in the United States have created new policing needs while affecting public opinion about law enforcement. These developments appear in the third expanded edition of the Encyclopedia of Police Science. 380 entries examine the theoretical and practical aspects of law enforcement discussing past and present practices. The added coverage makes the Encyclopedia more comprehensive with a greater focus on today's policing issues. Also added are themes such as accountability, the culture of police and the legal framework that affects police decision. New topics discuss recent issues such as Internet and crime, international terrorism, airport safety or racial profiling. Entries are contributed by scholars as well as experts working in police departments, crime labs and various fields of policing. **FBI Charter Act of 1979, S. 1612**
