Inland And Coastal Navigation For Power Driven And Sailing Vessels 2nd Edition:

Inland and Coastal Navigation: For Power-driven and Sailing Vessels, 2nd Edition David Burch, 2013-11-21 This book is an updated and expanded edition of a text that has been used in navigation courses for 30 years. It covers practical small craft navigation sail power or paddle starting from the basics and ending with all that is needed to navigate safely and efficiently on inland and coastal waters in all weather conditions. It is for beginners starting from scratch or for more seasoned mariners who wish to expand their skills. Topics include Charts Chart Reading and Chart Plotting Instruments and Logbook Procedures Compass Use Piloting and Dead Reckoning Lights and Buoyage Tides and Currents Rules of the Road GPS and other Electronic Aids. The GPS tells us where we are and how fast we are moving in what direction but it can never tell us the safest most efficient route to our destination. That fundamental task requires the basic navigation skills taught in this book which we can use as well to check the GPS underway and then be prepared to navigate without the GPS if we need to. The hallmark of good seamanship is to look ahead and be prepared. The text covers not only the long tested traditional methods of navigation but also the efficient use of the latest technology in electronic navigation and charting.

Autographic Design Dietmar Offenhuber, 2023-12-19 An ambitious vision for design based on the premise that data is material not abstract. Data analysis and visualization are crucial tools in today's society and digital representations have steadily become the default. Yet more and more often we find that citizen scientists environmental activists and forensic amateurs are using analog methods to present evidence of pollution climate change and the spread of disinformation. In this illuminating book Dietmar Offenhuber presents a model for these practices a model to make data generation accountable autographic design. Autographic refers to the notion that every event inscribes itself in countless ways. Think of a sundial for example a perfectly autographic device that displays information on itself. Inspired by such post digital practices of visualization and evidence construction Offenhuber describes an approach to

visualization based on the premise that data is a material entity rather than an abstract representation Emerson wrote Every act of the man inscribes itself in the memories of his fellows and in his own manners and face In Autographic Design Offenhuber introduces a model for design that emphasizes traces imprints and self inscriptions turning them into sensory displays In an age where misinformation is harder and harder to identify Autographic Design makes an urgent and persuasive case for a different approach that calls attention to the production of data and its connection to the material world
