## **Innovation Excellence In Central And Eastern Europe A Pwc Experience:**

**Innovation Excellence in Central and Eastern Europe** Mike Kubena, Mark Okes-Voysey, Andrej Vizjak, 2012-10-29 Innovation is high on the executive agenda in virtually every industry because companies can no longer develop markets and access them without innovation. Due to the dynamics of over a billion new customers mostly in emerging markets, radical new technologies and science and global connectivity, our decade will be the most innovative time since the industrial revolution. There is no time to lose as the increasing democratic standards in Central and Eastern Europe (CEE) and the ongoing globalization have already led to a new wave of M&A activities. The main question is: What must an enterprise do to stay in the market and even become more successful? Imitation and adaptation are only a possibility in the short run for a special type of company. Finally, Central and Eastern European countries face the challenge of not only responding to developments initiated elsewhere but also of playing a more active and creative role in initiating change. Through this book, PwC CEE will show you that innovation success is possible. Just do it. **Trust in Generative Artificial Intelligence** Joanna Paliszkiewicz, Ireneusz Dąbrowski, Leila Halawi, 2025-03-31 **Trust in Generative Artificial Intelligence: Human Robot Interaction and Ethical Considerations** is a comprehensive exploration of the critical role of trust in the rapidly evolving world of AI. Edited by Joanna Paliszkiewicz, Ireneusz Dąbrowski, and Leila Halawi, this book provides a thorough examination of how trust influences the integration and effectiveness of generative AI in various aspects of society. The book spans three main sections, offering insights from international experts across multiple disciplines and a blend of theoretical foundations and practical insights, making it a valuable resource for both understanding and implementing trust in AI systems. Readers will benefit from in-depth analyses of emerging trends, systematic literature reviews, and case studies on trust in diverse contexts, from social media to healthcare. The focus on human robot interaction and ethical considerations provides a nuanced understanding of the psychological and ethical factors at play. Aimed at researchers, practitioners, and policymakers interested in AI ethics and human robot interaction, this edited collection is also suitable for educators and students in fields related to AI and technology, providing a comprehensive resource for academic study and practical application. **Innovation Centres in Central and Eastern Europe** Heinz Fiedler, 1992 **Challenges for European Innovation Policy** Slavo Radosevic, Anna Kaderabkova, 2013-01-31 This book uniquely applies the Schumpeterian innovation policy perspective to the countries of Central and Eastern Europe (CEE). A broadly defined framework of the science, technology, innovation, and growth system underpins the empirical and conceptual analysis of the critical issues, including demand, FDI, finance, and education. Specifically, the expert contributors address the capacity of CEE to play a more significant role in the knowledge-based competitiveness of the EU. They question whether it is possible to bolster this capacity with innovation technology industry-specific policies and discuss the changes required at EU and individual country levels to remove sector and industry-specific obstacles to greater competitiveness based on innovation.
