Personnel Management Abstracts ,1995

Organizing-for-Innovation Mark Fenwick, Erik P.M. Vermeulen, Toshiyuki Kono, Tronel Joubert, 2023-10-31 This book argues that large corporations need to implement governance practices and processes that make them better innovators and that the challenge is to identify organizational principles and practices that provide the best chance of delivering innovative products to create a meaningful consumer experience In this context it is important to recognize that when we address organizational forms we are not thinking of corporate governance in the sense of managing agency costs and ensuring regulatory compliance but the more pressing business task of putting in place organizational systems and processes that facilitate value creation through continued and sustained innovation The book examines how the contemporary concept and discourse of corporate governance may be obsolete or at least is increasingly disconnected from the needs and realities of the most innovative firms today The concept of organizing for innovation identifying process and practices that deliver the best opportunities for innovation needs to take centre stage This book aims to contribute to the nascent debate in this area by bringing together a series of chapters that examine various issues related to organizing for innovation

Innovation Governance in an Open Economy ,2014

Innovation Leaders Jean-Philippe Deschamps, 2009-08-25 Innovation leaders promote and address the innovation agenda in their company Through personal conviction or competitive necessity they are obsessed with providing superior value to customers through innovation They know how to mobilize their staff behind concrete innovation initiatives and do not hesitate to personally coach innovation teams For innovation to occur leadership has to be collective To create a momentum for innovation in their company leaders from different functions need to team up to build innovation networks Innovation leadership is not just an innate talent that can be selected at the hiring level It can be developed within an appropriate company culture through careful leadership development typically achieved through career management and coaching Innovation leaders also need to stay on board and it is the responsibility of the top management team to create an attractive climate to develop and keep its innovation leaders There are plenty of books that deal with innovation or with new product development or with leadership this is different in its focus on the specifics of innovation leadership that particular form of leadership that stimulates and sustains innovation This book maps the broad territory of innovation leadership and contributes new thinking on the focus of the emerging leadership role of the CTO distinction between front end and back end innovation leaders the concept of aligning leadership styles with strategy and the chain of leadership concept Combining

practice based and empirical research based observations with simple conceptual frameworks illustrated by many company examples and case stories from a broad range of industries in the US and Europe this is a systematic presentation of innovation drivers and their implications in terms of what leaders need to do to make it work Innovation and Institutions Steven Casper, Frans van Waarden, 2005-01-01 The idea behind this book is that institutions are important when it comes to explaining the specialisation and performance of national innovation systems The idea is not new But largely the institution concept has remained somewhat vague and unspecified in the literature This book is valuable since it succeeds in opening up the black box of institutions and organisations The distinction between institutions at different levels and how they link up and form a systemic whole is especially original and fruitful The interdisciplinary team behind the book has also produced a welcome antidote to the current tendency to benchmark innovation systems exclusively on the basis of quantitative indicators The analysis demonstrates that some national systems do better in some specific areas because of being supported by institutions that are sometimes deeply rooted in history and culture This is why imitating best practice across countries is not a straight forward thing to do Bengt ke Lundvall Aalborg University Denmark Innovation and Institutions is an extensive elaboration on the make up of systems of innovation It examines why some countries are more innovative than others why national styles of innovation differ and goes on to explore why some countries make radical innovations but fail to successfully market them whilst others making incremental innovations have more commercial success The book draws on a variety of different literatures and perspectives to illustrate the organizational and institutional dimensions of national innovation systems Literatures discussed include the economics of innovation organizational sociology administrative science institutional economics organizational learning network analysis business systems economic governance and regulation This truly interdisciplinary book will be invaluable to academics and researchers focussing on innovation in a wide range of fields It will also strongly appeal to practitioners and policymakers concerned with innovation *Research Handbook on Innovation Governance for Emerging Economies* Stefan Kuhlmann, Gonzalo Ordóñez-Matamoros, 2017-01-27 Although in recent years some emerging economies have improved their performance in terms of R D investment outputs and innovative capacity these countries are still blighted by extreme poverty inequality and social exclusion Hence emerging countries are exposed to conditions which differ quite substantially from the dominant OECD model of innovation policy for development and welfare This Research Handbook contributes to the debate by looking at how innovation theory policy and practice interact and explains different types of configurations in countries that are characterized by two contrasting but mutually reinforcing features systemic failure and resourcefulness Focusing on innovation governance and public policies it aims to understand related governance failures and to explore options for alternative more efficient approaches
