Somatic-Oriented Therapies Herbert Grassmann, Maurizio Stupiggia, Stephen W. Porges, 2025-02-04 An innovative collection of research and theory from leading voices in the fields of trauma and somatic therapies **Somatic Oriented Therapies** represents a significant consolidation of innovative research and clinical approaches aimed at addressing trauma through various somatic modalities In the past six decades a multitude of therapeutic methods

have emerged globally revolutionizing trauma treatment and existential distress management. However, these approaches have often diverged, hindering the development of a cohesive, distinct field independent of traditional paradigms. This volume of collected work from some of the world's leading experts in trauma aims to delineate this novel domain of research and clinical intervention. It elucidates the common thread linking the contributing authors and introduces a new clinical perspective. Central to this perspective is the recognition of the profound significance of the body-to-body relationship between therapist and patient, the critical role of trust establishment within the clinical context as a prerequisite for deep transformation, and the possibility to question the body-finding unthought-of avenues of transformation. Contributors include Michael Allison, Martina Ardizzi, Ken Benau, David Berceli, Sue Carter, Cristiano Crescentini, Francesca Ferroni, Aaron Freedman, Vittorio Gallese, Jeltje Gordon, Lennox Susan Harper, Molly Boeder, Harris Bach Ho, Steve Hoskinson, Hanneke Kalisvaart, J.
