AO/ASIF Instrumentation F. Sequin, R. Texhammar, 2012-12-06 During their 20 years of activity members of the Association for the Study of Internal Fixation AO ASIF have made authoritative contributions to the development of internal and external fixation The close collaboration of surgeons basic researchers metallurgists engineers and the establishment of clinical documentation has made it possible to achieve a solid scientific basis for internal fixation Clear definitions for the standardization of different types of osteosynthesis were possible interfragmentary compression splintage and buttressing as well as combinations of these three techniques At the same time a scientific and workmanlike instrumentation was developed The idea was to keep diversification within limits but however to assemble a comprehensive collection of implants and instruments to answer all the problems presented by the complexity of bone operations Osteosynthesis is a difficult and demanding operative method Its claims on the surgeon and the theatre staff are high Therefore plans have existed for a long time to supplement the Manual of Internal Fixation with a detailed description of the AO Instrumentation its use and maintenance Our collaborator FRIDOLIN SEQUIN graduate engineer has accomplished this task with expert knowledge He has organized over many years courses for theatre nurses and has been able from the resulting experience to provide helpful suggestions When RIGMOR TEXHAMMAR RN joined AO International four years ago it was natural to include her as a co author
