

MASTER CHIEF

MASTER CHIEF PETTY OFFICER JOHN-117

Conscripted into the SPARTAN-II program as a child, the boy named John would be physically augmented and trained in Marine battle armor, ultimately becoming the Master Chief. For three decades, the Spartan would battle against the Covenant, eventually making the critical discovery of Halo and tipping the scales in humanity's favor. But in the aftermath of the war, the Chief would find the human race threatened by another force—an ancient Forerunner known as the Object. Although the Spartan would prevail, the conflict would not come without a loss: Cortana, the Chief's artificial construct and ally, would perish in battle.

CORTANA

CORTANA 0452-5

Created from the mind of Dr. Catherine Halsey, Cortana is a unique AI construct, as she was designed using the neural pathways of a young human. In 2552, she was paired with the Master Chief for Operation: RED FLAG, but the sudden fall of the planet Reach would set the two on a collision-course with Halo. The discovery of the ancient Forerunner would

not only bring victory in the war against the Covenant, but it would also lead to the emergence of the Object—an ancient Forerunner with a sinister hatred of humanity. During a battle aboard the Object's ship, Cortana would ultimately perish, working her life to stop the new enemy.

Cortana's translucent skin is made of a composite material, and she is able to change her appearance at will.

The ubiquitous mechanism accelerating cosmic rays at all the energies Antonio Codino, 2021-02-04. The mechanism accelerating Cosmic rays in the Milky Way galaxy and galaxy clusters is identified and described. The acceleration of Cosmic rays is a purely electrostatic process which operates up to the maximum energies of 10^{23} eV in galaxy clusters. Galactic Cosmic rays are accelerated in a pervasive electrostatic field active in the whole galaxy except in restricted regions shielded by interstellar and stellar plasma. As for instance, the region occupied by the Solar system. It is proved that the energy spectrum of the Cosmic radiation in the Milky Way galaxy in the region where the Solar system resides has a constant spectral index comprised between 2.64 and 2.68 and the maximum energies of galactic protons are 3.0×10^{19} eV. The agreement of these results with the experimental data is discussed in detail and highlighted. The various physical processes that maintain the stability of the electrostatic structure in the Milky Way galaxy are the same that generate the galactic magnetic field. Accordingly, the intensity, orientation, and direction of the galactic magnetic field are

evaluated The results of the calculation are compared with the observation data optical and mostly radio astronomi data The
accord of the intensity orientation and direction of the observed magnetic field with calculation is excellent Personnel
