Pediatric Weight Management and Obesity Sandra Gibson Hassink, 2007 This handy practical guide provides clinicians with a comprehensive approach to the medical management of overweight children and adolescents Coverage begins with the epidemiology pathophysiology and developmental aspects of child and adolescent obesity and a guide to evaluation of obese children Subsequent chapters address respiratory cardiovascular endocrine metabolic orthopaedic gastrointestinal renal and neurologic complications and comorbid conditions as well as mental health issues acute obesity related emergencies and obesity as part of genetic syndromes Pathophysiology is linked to clinical presentation evaluation and treatment and lifestyle issues are discussed where appropriate Highlighted boxes and algorithms help clinicians find and digest information quickly

Body Mass Index and Health Linda A. Ferrera, 2005 The Federal guidelines on the identification evaluation and treatment of overweight and obesity in adults have defined overweight as a body mass index value between 25 and 29.9 and obesity as a body mass index value greater than or equal to 30 BMI is a ratio between weight and height It is a mathematical formula that correlates with body fat used to evaluate if a person is at an unhealthy weight given a certain height BMI value is more useful for predicting health risks than the weight alone for adults ages 18 and up Individuals with high BMI s are at increased risk of developing certain diseases including Hypertension Cardiovascular Disease Dyslipidemia Adult Onset Diabetes Type II Sleep Apnea Osteoarthritis Female Infertility and other Conditions including idiopathic intracranial hypertension lower extremity venous stasis disease gastroesophageal reflux and urinary stress incontinence This new book gathers research from around the world in the critical field of obesity research and its effects

Health and Sustainability in the Canadian Food System Rod MacRae, Elisabeth Abergel, 2012-07-18 Civil society organizations are among the most vociferous critics of the modern food system Yet even after decades of campaigns governments have failed to address health and sustainability issues in a systematic way New approaches are in order and this volume showcases the research of experts from various disciplines who argue that solutions lie not just in lobbying elected officials but rather in initiatives at the subparliamentary level Case studies on a range of topics from breastfeeding and sustainable pest management promotion to programs such as Canada's Action Plan on Food Security tell a story of misguided campaigns and missed opportunities Real change this inspiring volume suggests is possible It will come when advocacy groups develop innovative strategies of influencing decision makers more resistant to public pressure business lobbies well connected to government agencies middle managers and ministries unused to collaborating across departmental mandates

Global Health Complications of Obesity Jahangir Moini, Raheleh Ahangari, Carrie Miller, Mohtashem Samsam, 2020-04-01 Global Health Complications of Obesity presents a valuable resource for research scientists and clinicians by covering the burden of obesity and related diseases and serving as a starting point for in depth discussions in academic settings and for obesity treatment specialists Obesity is associated with a statistically higher risk of heart disease hypertension insulin resistance type 2 diabetes and many other diseases This succinct resource focuses on the current data

research and management of obesity It is essential reading for healthcare professionals endocrinologists nutritionists public health students and medical students Presents clinical cases key terms and targeted references Addresses diseases including diabetes cancer hypertension osteoarthritis fatty liver disease infertility renal failure and depression Provides a link to new knowledge that is ideal for both researchers and clinicians

Nutrition and Behavior, 2nd Edition John Worobey, Beverly J Tepper, Robin Kanarek, 2015-08-14 The relationship between nutrition and behaviour is bi directional in nature with nutritional factors able to affect activity and disposition and behavior impacting diet and food intake This book reviews these links starting with their complex neurobiological basis such as in the case of folate deficiency and cognitive decline It also illustrates how behaviour may determine nutritional choices or status through peer modelling and poor dietary habits Micronutrients and eating disorders are then critically addressed with a review of current research methods and results before extra nutritional influencers on behaviour such as caffeine herbal supplements and alcohol are discussed in the final section
