Handbook Of Cosmic Hazards And Planetary Defense:

Handbook of Cosmic Hazards and Planetary Defense Joseph N. Pelton, Firooz Allahdadi, 2015-04-27 Covers in a comprehensive fashion all aspects of cosmic hazards and possible strategies for contending with these threats through a comprehensive planetary defense strategy This handbook brings together in a single reference work a rich blend of information about the various types of cosmic threats that are posed to human civilization by asteroids comets bolides meteors solar flares and coronal mass ejections cosmic radiation and other types of threats that are only recently beginning to be understood and studied such as investigation of the cracks in the protective shield provided by the Van Allen belts and the geomagnetosphere of matter antimatter collisions orbital debris and radiological or biological contamination Some areas that are addressed involve areas about which there is a good deal of information that has been collected for many decades by multiple space missions run by many different space agencies observatories and scientific researchers Other areas involving research and studies that have only recently gotten underway are discussed by some of the world's foremost experts in each of these areas who provide up to date and scientifically verifiable information Although much of the work in these various areas have been conducted by space agencies an expanding range of work is also being carried out by observatories by universities and other research centers and even by private foundations and professional organizations The purpose of this work is thus several fold to include the latest information and most systematic research from around the world in a single reference work to note where there are significant gaps in knowledge where new research spacecraft observatories or other initiatives are needed to fill in critical missing information and to give the best possible information about preventative actions that might be taken against cosmic threats and identify various alternative strategies that are now under way or planned to cope with these various threats Handbook of cosmic hazards and planetary defence, volume 2 ,2015

Planetary Defense Nikola Schmidt, 2018-12-26 Planetary defense from near Earth objects such as asteroids is a far more nuanced and challenging topic than it might seem Each day technology is making it easier to detect asteroid impact threats in advance but at present there is still no easy way to design and implement any form of global defense This book examines how various asteroid deflection methods can change global political affairs The authors believe that the final policy for potential Earth impacts should be based on practical engineering solutions and innovative architectural structures while at the same time reflecting the most recent political science contributions in ethical security studies and security cosmopolitanism Their focus is not limited to effective engineering solutions but rather extends to how such proposals resonate in possible political structures of the future Planetary defense cannot be achieved with technology alone the chapters in this volume highlight the issues that arise when space science and technology intersect with political science This complex interdisciplinary project not only demands global participation and collaboration but also proposes the way we can achieve it The authors explore various concepts of governance and their far reaching implications for planetary defense and

vice versa how scientific progress in Solar System observations and asteroid collision engineering influence political science and put pressure on the international legal framework The text is intentionally written for a diverse scholarly and diplomatic audience in a style accessible to non specialists and practitioners and can be read by those across diverse disciplinary backgrounds

Space Mining and Its Regulation Ram S. Jakhu, Joseph N. Pelton, Yaw Otu Mankata

Nyampong, 2016-08-12 This book addresses the complex technical challenges presented by remote space mining in terms of robotics remote power systems space transport IT and communications systems and more It also addresses the difficult oversight and regulatory issues that face states and non state enterprises that would take on the perilous task of obtaining natural resources from the Moon and asteroids An increasing number of countries are becoming involved in space related activities that were previously carried out primarily by the United States and the USSR now the Russian Federation How these regulatory endeavors might be handled in international treaties standards codes of conduct or other means have become a truly international political issue And there is yet another issue In the past space activities traditionally fell under the exclusive domain of government But the last few years have seen the emergence of the private sector of space entrepreneurs This poses many challenges for the pre existing governance regimes and state based conceptions of international law This book examines the adequacies and ambiguities in treaty provisions and national laws and in currently accepted practices involving the growing exploration and exploitation of space based natural resources *International*

Commercial and Military Uses of Outer Space

Melissa de Zwart, Stacey Henderson, 2021-02-25 This edited book brings together a diverse range of chapters on space related topics The authors included in this book are drawn from Australia and overseas from academia government industry civil society and the military This book contains chapters that cover topics such as law science archaeology defence policy and more all with a focus on space This edited collection is a timely international and interdisciplinary book which addresses some of the contemporary issues facing activities in space and those attempting to understand use and regulate the space domain This edited book seeks to normalise the role of women as experts in the space sector by not calling attention to the fact that all the authors are women they are all experts in their respective fields who just happen to be women Bringing together these contributions in this book in turn promotes the inclusion of diversity in the space sector This edited collection is an opportunity to influence the development of the space industry in terms of gender diversity and diversity of disciplines and thinking while it is in its formative stage rather than trying to redress imbalances once they are entrenched in the industry

Digital Defense Joseph Pelton, Indu B. Singh, 2015-10-16 Drs Pelton and Singh warn of the increasing risks of cybercrime and lay out a series of commonsense precautions to guard against individual security breaches This guide clearly explains the technology at issue the points of weakness and the best ways to proactively monitor and maintain the integrity of individual networks Covering both the most common personal attacks of identity fraud phishing malware and breach of access as well as the larger threats against companies and governmental systems the authors explain the vulnerabilities of the internet age As more and more of life's transactions take place online the average computer user and society at large have a lot to lose All users can take steps to secure their information Cybercrime is so subtle and hidden people can ignore the threat until it is too late Yet today about every three seconds a person is hit by some form of cyber attack out of the blue Locking the cyber barn door after a hacker has struck is way too late Cyber security cyber crime and cyber terrorism may seem to be intellectual crimes that don't really touch the average person but the threat is real Demystifying them is the most important step and this accessible explanation covers all the bases

The Routledge Companion to Smart Design Thinking in Architecture & Urbanism for a Sustainable, Living Planet Mitra Kanaani, 2024-11-11 This comprehensive companion surveys intelligent design thinking in architecture and urbanism investigates multiple facets of smart approaches to design thinking that augment the potentials of user experiences as well as his/her physical and mental interactions with the built environment Split into six paradigms this volume looks at the theoretical and historical background of smart design smart design methodologies and typologies smart materials smart design for extreme weather and climatic regions as well as climate change issues and side effects smart mobility and the role of digital technologies and simulations in architectural and urban design Often at odds with each other this volume places emphasis on smart design for various typologies and user groups emphasizing on advancements in form making and implementation of technology for healthy and sustainable living environments Written by emerging and established architects planners designers scientists and engineers from around the

New Solutions for the Space Debris

Problem Joseph N. Pelton, 2015-05-06 Addressing a pressing issue in space policy Pelton explores the new forms of technology that are being developed to actively remove the defunct space objects from orbit and analyzes their implications in the existing regime of international space law and public international law This authoritative review covers the due diligence guidelines that nations are using to minimize the generation of new debris mandates to de orbit satellites at end of life and innovative endeavours to remove non functional satellites upper stage rockets and other large debris from orbit under new institutional financial and regulatory guidelines Commercial space services currently exceed 100 billion USD business per annum but the alarming proliferation in the population of orbital debris in low medium and geosynchronous satellite orbits poses a serious threat to all kinds of space assets and applications There is a graver concern that the existing space debris will begin to collide in a cascading manner generating further debris which is known as the Kessler Syndrome Scientific analysis has indicated an urgent need to perform space debris remediation through active removal of debris and on
