Birren, K Warner Schaie, 2001-08-02 The Handbook of the Psychology of Aging has become the definitive reference source for information on the psychology of adult development and aging The Fifth Edition provides comprehensive reviews of research on biological and social influences on behavior and age related changes in psychological function In addition to covering environmental influences on behavior and aging and gender differences in aging new chapters in the Fifth Edition discuss wisdom creativity and technological change and the older worker This handbook is an essential reference for researchers in adult development and gerontology and suitable as an advanced textbook for courses on the psychology of aging **The Handbook of Aging and Cognition** Fergus I. M. Craik, Timothy A. Salthouse, 2011-03-15 Cognitive aging is a flourishing area of research A significant amount of new data a number of new theoretical notions and many new research issues have been generated in the past ten years This new edition reviews new findings and theories enables the reader to assess where the field is today and evaluates its points of growth The chapters are organized to run from reviews of current work on neuroimaging neuropsychology genetics and the concept

of brain reserve through the mainstream topics of attention memory knowledge and language to a consideration of individual differences and of cognitive aging in a lifespan context This edition continues to feature the broad range of its predecessors while also providing critical assessments of current theories and findings **Handbook of Neuropsychology** ,2001 *The Handbook of Aging and Cognition* Fergus I. M. Craik,Timothy A. Salthouse,2008 Cognitive aging is a flourishing area of research This third edition reviews the findings and theories since the previous edition and evaluates the field s points of growth Handbook of Neuropsychology, Volume 6 : Aging and Dementia ,2000 *Handbook of Neuropsychology: Sect. 8. Aging and dementia (Part 2)* ,1988 *Handbook of Normative Data for Neuropsychological Assessment* Maura Mitrushina,2005-02-10 When *Handbook of Normative Data for Neuropsychological Assessment* was published in 1999 it was the first book to provide neuropsychologists with summaries and critiques of normative data for neuropsychological tests The Second Edition which has been revised and updated throughout presents data for 26 commonly used neuropsychological tests including Trailmaking Color Trails Stroop Color Word Interference Auditory Consonant Trigrams Paced Auditory Serial Addition Ruff 2 and 7 Digital Vigilance Boston Naming Verbal Fluency Rey Osterrieth Complex Figure Hooper Visual Fluency Design Fluency Tactual Performance Wechsler Memory Scale Revised Rey Auditory Verbal learning Hopkins Verbal learning WHO UCLA Auditory Verbal Learning Benton Visual Retention Finger Tapping Grip Strength Dynamometer Grooved Pegboard Category and Wisconsin Card Sorting tests In addition California Verbal learning CVLT and CVLT II CERAD ListLearning and selective Reminding Tests as well as the newest version of the Wechsler Memory Scale WMS III and WMS IIIA are reviewed Locator tables throughout the book guide the reader to the sets of normative data that are best suited to each individual case depending on the demographic characteristics of the patient and highlight the advantages associated with using data for comparative purposes Those using the book have the option of reading the authors critical review of the normative data for a particular test or simply turning to the appropriate data locator table for a quick reference to the relevant data tables in the Appendices The Second Edition includes reviews of 15 new tests The way the data are presented has been changed to make the book easier to use Meta analytic tables of predicted values for different ages and education where relevant are included for nine tests that have a sufficient number of homogeneous datasets No other reference offers such an effective framework for the critical evaluation of normative data for neuropsychological tests Like the first edition the new edition will be welcomed by practitioners researchers teachers and graduate students as a unique and valuable contribution to the practice of neuropsychology Handbook of the Psychology of Aging ,2015-08-19 *Handbook of the Psychology of Aging* Eighth Edition tackles the biological and environmental influences on behavior as well as the reciprocal interface between changes in the brain and behavior during the course of the adult life span The psychology of aging is important to many features of daily life from workplace and the family to public policy matters It is complex and new questions are continually raised about how behavior changes with age Providing perspectives on the behavioral science of

aging for diverse disciplines the handbook explains how the role of behavior is organized and how it changes over time Along with parallel advances in research methodology it explicates in great detail patterns and sub patterns of behavior over the lifespan and how they are affected by biological health and social interactions New topics to the eighth edition include preclinical neuropathology audition and language comprehension in adult aging cognitive interventions and neural processes social interrelations age differences in the connection of mood and cognition cross cultural issues financial decision making and capacity technology gaming social networking and more Tackles the biological and environmental influences on behavior as well as the reciprocal interface between changes in the brain and behavior during the course of the adult life span Covers the key areas in psychological gerontology research in one volume Explains how the role of behavior is organized and how it changes over time Completely revised from the previous edition New chapter on gender and aging process A Practical Guide to Geriatric Neuropsychology Susan McPherson, Deborah Koltai, 2018-03-01 A Practical Guide to Geriatric Neuropsychology focuses on the skills required in testing and treating the older adult population Topics discussed include normal aging determining competency important factors to consider in conducting clinical interviews the importance of evaluating for depression and substance abuse screening tools for use in practice cognitive training and intervention and evaluation of the older adult in the workplace This book will be helpful for neuropsychologists interested in testing and providing recommendations for older adults and for psychologists interested in treating older adults **Handbook of Psychological Assessment** Gerald Goldstein, Michel Hersen, 2000-02-16 The field of psychological assessment has been undergoing rapid change The second edition of this Handbook published in 1990 appeared at the beginning of a decade marked by extensive advances in assessment in essentially all of its specialized areas There are many new tests new applications of established tests and new test systems Major revisions have appeared of established tests notably the Wechsler intelligence scales The time seemed right for a third edition since even over the relatively brief period of ten years many tests described in the second edition have been replaced and are no longer commonly used Furthermore much new research in such areas as neuropsychology cognitive science and psychopathology have made major impacts on how many tests and other assessment procedures are used and interpreted This third edition represents an effort to give the reader an overview of the many new developments in assessment while still maintaining material on basic psychometric concepts in order for it to continue to serve as a comprehensive handbook for the student and professional **An Assessment Guide To Geriatric Neuropsychology** Holly Tuokko, Thomas Hadjistavropoulos, 2014-04-04 At least half of all neuropsychological assessments are performed on elderly persons but the information clinicians need to make appropriate judgment calls is widely scattered Several books offering general descriptions of the cognitive functioning of the aged or of neuropsychological conditions affecting them are helpful to practitioners but do not provide reliable and valid normative information Two books that do provide this information do not focus on geriatric populations A concise yet comprehensive summary of what we now

know about those over 65 with an extensive bibliography An Assessment Guide to Geriatric Neuropsychology fills the gap The neuropsychological assessment of elderly persons involves not only the performance based measurement of various capacities but heavy reliance on reports from caregivers both formal and informal about the day to day functioning of the affected person It also raises important yet often neglected ethical concerns The authors discuss all the measures that detect and discriminate among cognitive disorders of elderly persons including special measures relevant to caregiver reports and provide useful tables to assist in differential diagnosis They also reflect on the ethical issues that often confront the assessor of an elderly individual informed consent confidentiality the right of bodily autonomy and self determination and appropriate feedback This book will be an invaluable resource for all those called on to evaluate older clients **Handbook of**
