## **Handbook Of Paper And Board:**

**Handbook of Paper and Board** Herbert Holik, 2013-03-25 Papermaking is a fascinating art and technology. The second edition of this successful 2 volume handbook provides a comprehensive view on the technical, economic, ecologic and social background of paper and board. It has been updated, revised and largely extended in depth and width, including the further use of paper and board in converting and printing. A wide knowledge basis is a prerequisite in evaluating and optimizing the whole process chain to ensure efficient paper and board production. The same is true in their application and end use. The book covers a wide range of topics: Raw materials required for paper and board manufacturing such as fibers, chemical additives and fillers; Processes and machinery applied to prepare the stock and to produce the various paper and board grades including automation and trouble shooting; Paper converting and printing processes; book preservation; The different paper and board grades as well as testing and analysing fiber suspensions; paper and board products and converted or printed matters; Environmental and energy factors as well as safety aspects. The handbook will provide professionals in the field e.g. papermakers as well as converters and printers, laymen, students, politicians and other interested people with the most up to date and comprehensive information on the state of the art, techniques and aspects involved in paper making, converting and printing.

*Handbook of Paper and Board* Herbert Holik, 2006-03-20 The fascinating and labor intensive process of papermaking is described in this first comprehensive handbook on the subject. **Handbook of Paper and Board** describes the entire papermaking processes used in industry for various types of paper including writing and printing paper, tissue paper, packaging paper, board and cardboard as well as their quality characteristics, wastepaper treatment and economical aspects. Midwest

**Handbook of Paper and Paperboard Packaging Technology** Mark J. Kirwan, 2012-11-07 The definitive industry reference on the paper and paperboard packaging sector. Now in a fully revised and updated second edition, this book discusses all the main types of packaging based on paper and paperboard. It considers the raw materials, the manufacture of paper and paperboard and the basic properties and features on which packaging made from these materials depends for its appearance and performance. The manufacture of twelve types of paper and paperboard based packaging is described together with their end use applications and the packaging machinery involved. The importance of pack design is stressed as well as how these materials offer packaging designers opportunities for imaginative and innovative design solutions. Environmental factors including resource sustainability, societal and waste management issues are addressed in a dedicated chapter. The book is directed at readers based in companies which manufacture packaging grades of paper and paperboard, companies involved in the design, printing and production of packaging and companies which manufacture inks, coatings, adhesives and packaging machinery. It will be essential reading for students of packaging technology and technologists working in food manufacturing who are users of paper and paperboard packaging products. Praise for the First Edition: This book is a valuable addition to the library of any forward looking company by providing in depth coverage of all

aspects of packaging which involve the most ecologically acceptable material namely paper and paperboard International Journal of Dairy Technology a welcome contribution to a field where coverage was previously limited to subject specific books or to single chapters in textbooks on broader aspects of packaging technology Packaging Technology and Science
