Functional Carbohydrates

Jian Chen,Yang Zhu,Song Liu,2017-10-02 Functional carbohydrates is the term used to describe those carbohydrates that play an important role in strengthening immunity decreasing the level of blood lipid and regulating the intestinal flora of

humans beyond those simply used as the energy supplying materials To date functional carbohydrates mainly cover dietary fiber functional polysaccharides functional oligosaccharides sugar alcohols and other functional monosaccharides Functional Carbohydrates Development Characterization and Biomanufacture facilitates tracking the important progresses in functional carbohydrates This book addresses the history and recent developments of a selected number of important functional carbohydrates and it introduces the source properties and applications of a number of functional carbohydrates It describes in detail the biomanufacture of these carbohydrates based on fermentation or enzyme catalysis including the strain screening and improvement optimization of fermentation process and product downstream processing *Carbohydrate Chemistry* J S Brimacombe,2007-10-31 Carbohydrate Chemistry provides review coverage of all publications relevant to the chemistry of monosaccharides and oligosaccharides in a given year The amount of research in this field appearing in the organic chemical literature is increasing because of the enhanced importance of the subject especially in areas of medicinal chemistry and biology In no part of the field is this more apparent than in the synthesis of oligosaccharides required by scientists working in glycobiology Glycomedicinal chemistry and its reliance on carbohydrate synthesis is now very well established for example by the preparation of specific carbohydrate based antigens especially cancer specific oligosaccharides and glycoconjugates
