Handbook Of Family Medicine:

Handbook of Family Medicine Bob Mash, 2011 Handbook of Family Medicine 3rd edition is a practical guide to being a general practitioner in a southern African context. It focuses on the circumstances affecting family medicine within developing countries, the various skills needed on a day to day basis and the best approach to patient care from a holistic perspective. It is the only African text of this nature that deals with the unique difficulties that family medicine doctors have to manage particularly in under resourced areas. The real life case studies provide insight into what medical students will encounter in practice. Other important topics include psychological side effects of common medications, resistance to treatment, spiritual concerns in the treatment of patients, cultural differences in healing, suicide, AIDS, prevention of disease, and many others. Leonard Haas is a noted authority in the area of primary care psychology and has recruited expert contributors for the 41 chapters and two appendices that make up this definitive handbook for a growing and important subspecialty in clinical psychology.
