Financing long-term services and supports Joshua Wiener, Molly Knowles, Erin White, 2017-09-12 This article provides an overview of financing for long term services and supports (LTSS) in the United States, paying special attention to how it has changed and not changed over the last 30 years. Although LTSS expenditures have increased greatly like the rest of health care, the broad outline of the financing system has remained remarkably constant. Medicaid, a means tested program, continues to dominate LTSS financing while private long term care insurance plays a minor role. High out of pocket costs and spending down to Medicaid because of those high costs continue to be hallmarks of the system. Although many major LTSS financing reform proposals were introduced over this period, none was enacted except the Community Living Assistance Services and Supports Act, which was repealed before implementation because of concerns about adverse selection. The one major change during this time period has been the very large increase in Medicare spending for post acute services such as short term skilled nursing facility and home health care. With the aging of the population, demand for LTSS is likely to increase, placing strain on the existing system.

Clinical Ethics Handbook for

Nurses Pamela Grace, Aimee Milliken, 2022-05-05 This handbook provides tools for nurse educators ethics educators practicing nurses and allied health professionals for developing confidence and skill in ethical decision making in interdisciplinary settings such as acute and chronic care hospitals and clinics It is useful for all healthcare personnel who face ethical issues in the course of their work and who work with nurses to resolve these issues While the content is based on a US context the concerns of nurses internationally are discussed and emphasized Nurses working in acute and chronic care settings face many obstacles to providing good care and are often the first line of defense related to patient safety and meeting the needs of patients and their families Some of the obstacles to optimal patient care are institutional some sociocultural and others the result of inadequate communication Evidence points to the idea that while nurses do have the knowledge and skills to address practice problems of various sorts they may not be confident in their skills of ethical decision making and advocacy actions This is a resource to develop moral agency on behalf of individuals and to address broader barriers to good care raised at the local community or social levels
