Samuel Walker, 2016-06-27 In this concise account of why America used atomic bombs against Japan in 1945 J Samuel Walker analyzes the reasons behind President Truman s most controversial decision Delineating what was known and not known by American leaders at the time Walker evaluates the options available for ending the war with Japan In this new edition Walker incorporates a decade of new research mostly from Japanese archives only recently made available that provides fresh insight on the strategic considerations that led to dropping the bomb From the debate about whether to invade or continue the conventional bombing of Japan to Tokyo s agonizing deliberations over surrender and the effects of both low and high level radiation exposure Walker continues to shed light on one of the most earthshaking moments in history Rising above an often polemical debate the third edition presents an accessible synthesis of previous work and new research to help make sense of the events that ushered in the atomic age *Memory and History* Joan Tumblety, 2013-07-15 How does the historian approach memory and how do historians use different sources to analyze how history and memory interact and impact on each other Memory and History explores the different aspects of the study of this field Taking examples from Europe Australia the USA and Japan and treating periods beyond living memory as well as the recent past the volume highlights the contours of the current vogue for memory among historians while demonstrating the diversity and imagination of the field Each chapter looks at a set of key historical and historiographical questions through research based case studies How does engaging with memory as either source or subject help to illuminate the past What are the theoretical ethical and or methodological challenges that are encountered by historians engaging with memory in this

way and how might they be managed How can the reading of a particular set of sources illuminate both of these questions The chapters cover a diverse range of approaches and subjects including oral history memorialization and commemoration visual cultures and photography autobiographical fiction material culture ethnic relations the individual and collective memories of war veterans The chapters collectively address a wide range of primary source material beyond oral testimony photography monuments memoir and autobiographical writing fiction art and woodcuttings everyday and exotic cultural artefacts journalism political polemic the law and witness testimony This book will be essential reading for students of history and memory providing an accessible guide to the historical study of memory through a focus on varied source materials

Prompt and Utter Destruction J. Samuel Walker, 2016 **Mass Atrocity, Collective Memory, and the Law** Mark Osiel, 1999-09-01 To this end writes Osiel we should pay closer attention to the way an experience of administrative massacre is framed within the conventions of competing theatrical genres Defense counsel will tell the story as a tragedy while prosecutors will present it as a morality play The judicial task at such moments is to employ the law to recast the courtroom drama in terms of a theater of ideas which engages large questions of collective memory and even national identity Osiel asserts that principles of liberal morality can be most effectively inculcated in a society traumatized by fratricide when proceedings are conducted in this fashion **Hiroshima** Ran Zwigenberg, 2014-09-15 An original and compelling new analysis of Hiroshima's place within the global development of Holocaust and World War II memory *Remembering the Cold War* David Lowe, Tony Joel, 2014-01-21 Remembering the Cold War examines how more than two decades since the collapse of the Soviet Union Cold War legacies continue to play crucial roles in defining national identities and shaping international relations around the globe Given the Cold War's blurred definition it has neither a widely accepted commencement date nor unanimous conclusion what is to be remembered This book illustrates that there is in fact a huge body of remembrance and that it is more pertinent to ask what should be included and what can be overlooked Over five sections this richly illustrated volume considers case studies of Cold War remembering from different parts of the world and engages with growing theorisation in the field of memory studies specifically in relation to war David Lowe and Tony Joel afford careful consideration to agencies that identify with being victims of the Cold War In addition the concept of arenas of articulation which envelops the myriad spaces in which the remembering commemorating memorialising and even revising of Cold War history takes place is given prominence Memories of Post-Imperial Nations Dietmar Rothermund, 2015-05-14 Memories of Post Imperial Nations presents the first transnational comparison of Great Britain the Netherlands Belgium France Portugal Italy and Japan all of whom lost or decolonized their overseas empires after 1945 Since the empires of the world crumbled the post imperial nations have been struggling to come to terms with the present and as recall sets in wars of memory have arisen leading to a process of collective editing As these nations rebuild themselves they shed old characteristics and acquire new ones looking at new orientations This book brings together varying perspectives with

historians and political scientists of these nations attempting to bind memory and its experience of different post imperial nations
