Andrew E. Budson, Elizabeth A. Kensinger, 2023 One of us Elizabeth had the opportunity to conduct research with a gentleman named Henry Molaison better known by his initials H M 1 who had the interior portion of his left and right temporal lobes the part of your brain next to your temples removed in 1953 because of epileptic seizures that were difficult to control From a technical standpoint the surgical procedures went fine But as he recovered the doctors and researchers soon noticed something very troubling he was unable to form any new memories He could read and talk and if you were having a brief conversation with him you would probably not notice anything amiss But family members would visit and although he knew who they were he would have no memory of them coming New doctors would introduce themselves and the next day or even the next hour he did not recall that he had met them It was then that the doctors understood that somehow the removal of those parts of the temporal lobe caused him to become completely amnesic
