- What is psychology? the scientific study of the human mind and its functions, especially those affecting behavior in a given context
- What is the mind? the element of a person that enables them to be aware of the world and their experiences, to think, and to feel; the faculty of consciousness and thought
- What is a gene? a unit of heredity which is transferred from a parent to offspring and is held to determine some characteristic of the offspring.
- What is a trait ? a distinguishing quality or characteristic, typically one belonging to a person.
- What is natural selection? the process by which heritable traits that make it more likely for an organism to survive and successfully reproduce become more common in a population over successive generations. It is a key mechanism of evolution.
- What is evolution? is the process whereby the frequencies of traits within populations of organisms can change over time. Its action over large stretches of time explains the origin of new species and ultimately the vast diversity of the biological world
- What is primary reality? the reality of our real world. In Primary reality, the experience evoking stimulation arrives at our sensory organs directly from objects from the real world.
- What is genetics? the scientific study of genes and heredity—of how certain qualities or traits are passed from parents to offspring as a result of changes in DNA sequence
- What is genomics? interdisciplinary field of biology focusing on the structure, function, evolution, mapping, and editing of genomes. A genome is an organism's complete set of DNA, including all of its genes as well as its hierarchical, three-dimensional structural configuration.
- What is heredity ? the passing on of physical or mental characteristics genetically from one generation to another.
- What is Psyche? the "life force" that gives living things their form, or soul as the form of the body.

History And Systems In Psychology Study Guide:

History and Systems of Psychology James F. Brennan, Keith A. Houde, 2022-11-17 History and Systems of Psychology provides an engaging introduction to the rich story of psychology's past. Retaining its trademark clarity and accessibility, the Eighth Edition also features expanded coverage of non-western traditions in psychology as well as added coverage of nineteenth-century advances in philosophy and science. The emergence of applications of psychology in clinical, educational, neuroscientific, and social settings are further emphasized within the twenty-first-century landscape of psychology as a cognitive and a positive science. Assuming little prerequisite knowledge, the authors discuss the people, places, and concepts that have shaped psychology's story and show that we remain fascinated and perplexed by the same enduring questions that confronted our ancestors: namely, our wonder at our subjectivity and consciousness of self. The Eighth Edition is supported by rich online resources including a manual, test bank, and lecture slides for instructors, and study guides and links to primary source literature for students.

History of Psychology D. Brett King, William Douglas Woody, Wayne Viney, 2015-07-14 A History of Psychology Ideas in Context 5 traces psychological thought from antiquity through early 21st-century advances, giving students a thorough look into psychology's origins and development. In addition, this book can also be used as a teaching tool for graduate students and trainees at various levels. The book is divided into three sections: Section I Foundations of Clinical Neuropsychology, Section II Fundamentals of Assessment, and Section III Disorders and Conditions. The format is geared toward exam preparation and is much less dense than a typical textbook. Materials are provided in a concise, outlined manner with liberal use of bullets, boxes, and illustrations, tables that allow readers to easily review and integrate information into their already established knowledge base. To augment the study guide, a recommended readings list at the end of each chapter provides references to more comprehensive materials considered important or seminal in each topic area. *Catalog of Copyright Entries.
