The Discovery of Mind Ardi Roelofs, 2024-10-18 This book presents a concise history of the scientific discovery of the mind Although people have speculated about the nature and functioning of their minds for thousands of years it was only about 200 years ago that they replaced the philosophical armchair with the laboratory and began to investigate the mind scientifically Surprisingly the work of one of the founders of scientific psychology Wilhelm Wundt 1832 1920 has been largely forgotten despite its relevance to current psychology Taking a fresh look at history this book discusses important empirical and theoretical discoveries made in the few decades before and in the 150 years after the publication of Wundt s groundbreaking monograph *Grundz ge der physiologischen Psychologie* in 1874 Crucial evidence from past behavioral and patient studies to recent neuroimaging is synthesized to support a thought provoking account of key aspects of the human mind

The Power of Experiments Michael Luca, Max H. Bazerman, 2021-03-02 How tech companies like Google Airbnb StubHub and Facebook learn from experiments in our data driven world an excellent primer on experimental and behavioral economics Have you logged into Facebook recently Searched for something on Google Chosen a movie on Netflix If so you ve probably been an unwitting participant in a variety of experiments also known as randomized controlled trials designed to test the impact of different online experiences Once an esoteric tool for academic research the randomized controlled trial has gone mainstream No tech company worth its salt or its share price would dare make major changes to its platform without first running experiments to understand how they would influence user behavior

In this book Michael Luca and Max Bazerman explain the importance of experiments for decision making in a data driven world Luca and Bazerman describe the central role experiments play in the tech sector drawing lessons and best practices from the experiences of such companies as StubHub Alibaba and Uber Successful experiments can save companies money eBay for example discovered how to cut 50 million from its yearly advertising budget or bring to light something previously ignored as when Airbnb was forced to confront rampant discrimination by its hosts Moving beyond tech Luca and Bazerman consider experimenting for the social good different ways that governments are using experiments to influence or nudge behavior ranging from voter apathy to school absenteeism Experiments they argue are part of any leader s toolkit With this book readers can become part of the experimental revolution
