History Tumbuka 1400 19:

A History of the Tumbuka from 1400 to 1900 Yizenge Chondoka, Frackson F. Bota, 2015-12-16 This is the first book on the history of the Tumbuka that traces their origin from the Luba Kingdom in the present Democratic Republic of Congo to where they are settled today. It details their leaders, the routes they used, the kingdom they formed, and the many cultural practices they have followed, and how from the eighteenth century their kingdom was invaded and ruled by many non-Tumbuka ethnic groups that were eventually absorbed in their culture. The study was overdue. Fortunately, the delay has been rewarded because the duty of doing this important work fell in good hands. The book improves our understanding of the Tumbuka in the twentieth century and beyond. Probably the strongest strength of the book is that the general reader and the specialist will find it easy to read. Professor Ackson Kanduzi, History Department, University of Swaziland

Yahweh: Origin of a Desert God Robert D. Miller II, 2021-03-08 Recognizing the absence of a God named Yahweh outside of ancient Israel, this study addresses the related questions of Yahweh's origins and the biblical claim that there were Yahweh worshipers other than the Israelite people. Beginning with the Hebrew Bible with an exhaustive survey of ancient Near Eastern literature and inscriptions discovered by archaeology and using anthropology to reconstruct religious practices and beliefs of ancient Edom and Midian, this study proposes an answer: Yahweh, worshipping Midianites of the Early Iron Age, brought their deity along with metallurgy into ancient Palestine and the Israelite people.

Wealth from the Rocks Mwelwa C. Musambachime, 2016-07-29 This study focuses on the study of metallurgy in pre-colonial Zambia to 1890. A general review of the literature on metallurgy in pre-colonial Zambia reveals that during the period our study up to 1890, three metals were mined: Iron production was a widespread, important, and significant phenomenon responsible for producing utility tools: hoes, axes, knives, weapons, spears, arrow heads, and broad knives, and regalia for the political and religious office holders. Copper, which was confined to few areas, and gold to even fewer areas. Metallurgy was an important economic activity in which all ethnic groups participated in different levels of intensity. From iron ore, which was smelted in elaborate and complicated processes imbued in magic, song, dance, incantations, medicines, and taboos by members of exclusively male guilds, blacksmiths were able to produce the following tools used in agriculture: hoes, axes used to clear forest, stays or areas to be cultivated to grow food for subsistence, non-edible crops such as tobacco and hemp, which were smoked as part of relaxation; cotton used to make blankets, sand shawls, needles for mending clothes, and knives for a variety of uses; b) hunting using varieties of spears to hunt game, seek protection from dangerous animals for defence of resources, or offence to capture desired resources; c) various sizes of hooks used in fishing different varieties of fish; and d) making of regalia used in chieftaincies and priesthood as symbols of authority. Copper was also smelted and put in ingots of varying sizes and rods of varying sizes and lengths, which were used to make copper wires, as wires, rods, vessels, and other utensils. Copper smiths produced jewellery and ornaments and cast art pieces such as statues and necklaces worn by men and women as status

symbols b used in exchange of goods and services as currency and c used to produce regalia for the for those in authority Gold was mined directly and processed into making as variety of items such as buttons and regalia In its various forms of development and sophistication metallurgy was responsible for the economic social and political advances among the pre colonial societies A variety of skills was required for building furnaces producing charcoal smelting and forging iron into goods Metallurgy and production of various items that were needed and necessary for an improved life were generally not an enclave activity but a process that satisfied the totality of socioeconomic needs It also promoted the gender division of labour within community Wealth from the Rocks is therefore a detailed study of the place role and function of metallurgy in pre colonial Zambian societies

What are the Effects of Cultural Traditions on the Education of women? (The Study of the Tumbuka People of Zambia) Christine Phiri Mushibwe, 2014-02-01 Cultural traditions do adversely affect the education of many people in the world Women are unfortunately the most affected victims of their culture This book demonstrates how cultural traditions can militate against the education of women in Zambia with a focus on the Tumbuka tribe The evidence at hand demonstrates that patrilineal groupings are strongholds of the patriarchal predisposition and patriarchal attitudes and cultural traditions do not recognize women as equal partners with men The Tumbuka women s experiences and beliefs reflect socio cultural traditional norms that tend to limit gender equality and compel women to accept and justify male domination at the expense of their own status and to regard consequent inequalities as normal Evidence demonstrates that the initiation rites an active institution for girls of pubescent age interfere more with the school based education of girls The women are active social agents as well as passive learners who will not allow the girls they are
